Volume Contents

Number 1. January

Intracellular Distribution of Hydroperoxide Isomerase. D. C. Zimmerman, B. A. Vick, and T. K. Borg 1
Correlations of Growth Rate and De-etiolation with Rate of *Ent*-Kaurene Biosynthesis in Pea (*Pisum sativum* L.). Paul R. Ecklund and Thomas C. Moore 5
An Apparatus to Produce Gas Mixtures with Controlled CO_2, O_2, and Water Vapor Concentrations. H. R. Koller and J. H. Thorne 11
Regulation of Hexose Transport in *Chlorella vulgaris*. Characteristics of Induction and Turnover. D. Haass and W. Tanner 14
Translocation of Radioactive Carbon after the Application of ^{14}C-Alanine and $^{14}CO_2$ to Sunflower Leaves. R. E. Chopowick and D. F. Forward 21
Activation of 80S Maize Ribosomes by Red Light Treatment of Dark-grown Seedlings. R. L. Travis, Joe L. Key, and Cleon W. Ross 28
Inhibition of the Photosynthetic Capacity of Isolated Chloroplasts by Ozone. Christopher Coulson and Robert L. Heath 32
Ribulose Diphosphate Carboxylase from Freshly Ruptured Spinach Chloroplasts Having an *in Vivo* $Km[CO_2]$. James T. Bahr and Richard G. Jensen 39
Water-deficit Stress, Ethylene Production, and Ripening in Avocado Fruits. I. Adato and S. Gazit 45
A Digital Diffusion Porometer Circuit. Edwin L. Fiscus 47
Mode of Pisatin Induction. Increased Template Activity and Dye-binding Capacity of Chromatin Isolated from Polypeptide-treated Pea Pods. Lee A. Hadwiger, Ali Jafri, Sharon von Broembsen, and Robert Eddy, Jr. 52
Patterns of Food Utilization by the Germinating Lettuce Seeds. Won-Mok Park and Shepley S. C. Chen 64
Factors Affecting the Reduction of Acetylene by *Rhizobium*-Soybean Cell Associations *in Vitro*. Donald A. Phillips 67
Alkaloid Changes in Tobacco Seeds during Germination. W. W. Weeks and L. P. Bush 73
Rapid Phytochrome-mediated Changes in Adenosine 5′-Triphosphate Content of Etiolated Bean Buds. Judith M. White and Carl S. Pike 76
Ethylene-induced Tropism of *Trifolium fragiferum* L. Stolons. Dale J. Hansen and Leo E. Bendixen 80
Activation of Protein Synthesis upon Dilution of an *Arachis* Cell Culture from the Stationary Phase. Desh Pal S. Verma and Abraham Marcus 83
A Simple Technique for the Establishment of Nitrogenase in Soybean Callus Culture. J. J. Child and T. A. LaRue 88
High Energy Charge as a Requirement for Axis Elongation in Response to Gibberellic Acid and Kinetin during Stratification of *Acer saccharum* Seeds. J. A. Simmonds and E. B. Dumbroff 91
Enhancement of Phloem Exudation from Cut Petioles by Chelating Agents. R. W. King and Jan A. D. Zeevaart 96
The Oxidation of Malate and Exogenous Reduced Nicotinamide Adenine Dinucleotide by Isolated Plant Mitochondria. D. A. Day and J. T. Wiskich 104
Greater Length of Ribonucleic Acid Synthesized by Chromatin-bound Polymerase from Auxin-treated Soybean Hypocotyls. T. J. Guilfoyle and J. B. Hanson 110
Phytochrome and Seed Germination. VI. Phytochrome and Temperature Interaction in the Control of Cucumber Seed Germination. Frone A. Eisenstadt and Alberto L. Mancinelli 114
Effect of Heat Shock on Plant Growth and on Lipid and β-Glucan Syntheses. L. Ordin, C. Itai, A. Benzioni, C. Musolan, and J. I. Kindinger 118
Higher Plant Cell Membrane Resistance by a Single Intracellular Electrode Method. W. P. Anderson, D. L. Hendrix, and N. Higinbotham 122
A Water Potential Threshold for the Increase of Abscisic Acid in Leaves. Thomas J. Zabadal 125
The Effect of Growth in 99.8 Deuterium Oxide on the Ultrastructure of Winter Rye. J. Waber and W. S. Sakai 128
Instructions for Contributors i

Number 2. February

Steryl Glycoside Formation in Seedlings of *Nicotiana tabacum* L. Parshall B. Bush and C. Grunwald 131
Properties of Phosphoribulokinase of Whole Chloroplasts. Mordhay Avron and Martin Gibbs 136
Carbon Dioxide Fixation in the Light and in the Dark by Isolated Spinach Chloroplasts. Mordhay Avron and Martin Gibbs 140
Formation of Adenosine 5′-Phosphorofluoridate and the Assay of Adenyl Cyclase in Barley Seeds. Robert Alvarez, Thomas C. Moore, and Josef Vandepeute 144
Utilization of Nucleoside Diphosphate Glucoses in Developing Cotton Fibers. Deborah P. Delmer, C. A. Beasley, and L. Ordin 149

A Failure to Detect an Influence of Magnetic Fields on the Growth Rate and Circadian Rhythm of *Neurospora crassa*. D. MICHAEL BITZ AND MALCOLM L. SARGENT 154
Accumulation and Radial Transport of Ions from Potassium Salts by Cucumber Roots. BRUCE J. COOIL 158
Mechanism of Indole-3-acetic Acid Conjugation. No Induction by Ethylene. RAPHAEL GOREN, MARTIN J. BUKOVAC, AND JAMES A. FLORE 164
Enzymes Related to Lactate Metabolism in Green Algae and Lower Land Plants. PETER J. GRUBER, SUE ELLEN FREDERICK, AND N. E. TOLBERT 167
Biosynthesis of Phosphatidylethanolamine by Enzyme Preparations from Plant Tissues. B. A. MACHER AND J. B. MUDD 171
The Participation of Two Rhythms in the Leaf Movements of *Xanthium* Plants Given Various Light-Dark Cycles. TAKASHI HOSHIZAKI, D. E. BREST, AND K. C. HAMNER 176
Comparative Enzymology of the Adenosine Triphosphate Sulfurylases from Leaf and Swollen Hypocotyl Tissue of *Beta vulgaris*. Multiple Enzyme Forms in Hypocotyl Tissue. D. I. PAYNTER AND J. W. ANDERSON 180
Wound Healing in Potato Tuber Tissue. Phosphon Inhibition of Developmental Processes Requiring Protein Synthesis. R. BORCHERT, J. D. MCCHESNEY, AND D. WATSON 187
Physiology of the *Yellow-Green* 6 Gene in Tomato. A Possible Interrelationship between the Phenotypic Expressions of the *Yellow-Green* 6 Gene Mutation and the Gibberellins. ANTONIO T. PEREZ, HERBERT V. MARSH, JR., AND WILLIAM H. LACHMAN 192
The Flavin Content of Clovers Relative to Symbiosis with a Riboflavin-requiring Mutant of *Rhizobium trifoli*. C. E. PARKHURST, E. A. SCHWINGHAMER, S. W. THORNE, AND F. J. BERGERSEN 198
Induction of Porphyrin Synthesis in Etiolated Bean Leaves by Chelators of Iron. JEFFREY DUGGAN AND MERRILL GASSMAN 206
S-Acyl Glutathione Thioesterase of Plant Tissue. L. K. WINBERRY AND J. B. MUDD 216
Further Studies on the Bicarbonate Stimulation of Photophosphorylation in Isolated Chloroplasts. WILLIAM S. COHEN AND ANDRE T. JAGENDORF 220
Activation of *Avena* Coleoptile Cell Wall Glycosidases by Hydrogen Ions and Auxin. KENNETH D. JOHNSON, DAVID DANIELS, MICHAEL J. DOWLER, AND DAVID L. RAYLE 224
Auxin Does Not Alter the Permeability of Pea Segments to Tritium-labeled Water. MICHAEL J. DOWLER, DAVID L. RAYLE, W. ZACCHEUS CANDE, PETER M. RAY, HILDEGARD DURAND, AND MEINHART H. ZENK 229
Elimination of the Lag Period in Chloroplast Development in a Chlorophyll Mutant of Peanuts. C. R. BENEDICT, D. L. KETRING, AND R. N. TOMAS 233
Internal Water Status of Kinetin-treated, Salt-stressed Plants. MARY BETH KIRKHAM, W. R. GARDNER, AND G. C. GERLOFF 241
Inhibition of Sterol Biosynthesis in *Chlorella sorokiniana* by Triparanol. JARVIS T. CHAN, GLENN W. PATTERSON, SAMSON R. DUTKY, AND CHARLES F. COHEN 244
Isolation and Partial Characterization of Four Host-specific Toxins of *Helminthosporium maydis* (Race T). ARTHUR L. KARR, JR., DALE B. KARR, AND GARY A. STROBEL 250
Rapid Estimates of Relative Water Content. RICHARD E. SMART AND GAIL E. BINGHAM 258
Isolation and Characterization of Organelles from Soybean Suspension Cultures. T. S. MOORE AND H. BEEVERS 261
Actions of Gibberellic Acid and Phytochrome on the Germination of Grand Rapids Lettuce Seeds. WILLIAM VIDAVER AND A. I-HSIUNG HSIAO 266
Sicklepod Surface Wax Response to Photoperiod and S-(2,3-Dichloroallyl)diisopropylthiocarbamate (Diallate). ROBERT E. WILKINSON 269
Cytochemical Localization of Catalase Activity in Glyoxysomes from Castor Bean Endosperm. CHRISTIAN BIEGLMAYER, HELMUT RUIS, AND JÜRG GRAF 276
Light-controlled Stem Elongation in Pea Seedlings Grown under Varied Light Conditions. WILLIAM M. ELLIOTT AND JOHN H. MILLER 279
Irreversible Plastid Loss in *Euglena gracilis* under Physiological Conditions. J. R. COOK, PATRICIA HARRIS, AND D. S. NACHTWEY 284
The Biosynthesis of δ-Aminolevulinic Acid in Higher Plants. I. Accumulation of δ-Aminolevulinic Acid in Greening Plant Tissues. SAMUEL I. BEALE AND PAUL A. CASTELFRANCO 291
The Biosynthesis of δ-Aminolevulinic Acid in Higher Plants. II. Formation of ^{14}C-δ-Aminolevulinic Acid from Labeled Precursors in Greening Plant Tissues. SAMUEL I. BEALE AND PAUL A. CASTELFRANCO 297
Inhibition of Photophosphorylation by Kaempferol. CHARLES J. ARNTZEN, SCOTT V. FALKENTHAL, AND SANDRA BOBICK 304
Fluxes of a Nonelectrolyte and Compartmentation in Cells of Carrot Root Tissue. Z. GLINKA 307
A Polygalacturonase from Citrus Leaf Explants. Role in Abscission. J. RIOV 312
Soluble Peroxidase in Fluid from the Intercellular Spaces of Tobacco Leaves. W. G. RATHMELL AND LUIS SEQUEIRA 317
Effect of Low Temperature on Amino Acid Metabolism in Wintering Poplar. Arginine-Glutamine Relationships. SHONOSUKE SAGISAKA 319
Corrections 323
Announcement: New Rapid Reprints 324

Number 3. March

Response of Seedlings of a Dwarf and a Normal Strain of Watermelon to Gibberellins. J. BRENT LOY AND PETER B. W. LIU 325

Effect of Ethrel and *Ceratocystis fimbriata* on the Synthesis of Fatty Acids and 6-Methoxy Mellein in Carrot Root. J. G. JAWORSKI AND J. KUĆ 331
The Potassium Content of *Gonyaulax polyedra* and Phase Changes in the Circadian Rhythm of Stimulated Bioluminescence by Short Exposures to Ethanol and Valinomycin. BEATRICE M. SWEENEY 337
Phytochrome-dependent Reduction of Nicotinamide Nucleotides in the Mitochondrial Fraction Isolated from Etiolated Pea Epicotyls. KATSUSHI MANABE AND MASAKI FURUYA 343
Polar Transport of Kinetin in Tissues of Radish. J. W. RADIN AND R. S. LOOMIS 348
Phytochrome Stability *in Vitro*. I. Effect of Metals Ions. STEPHEN G. LISANSKY AND ARTHUR W. GALSTON 352
Stomatal Behavior and Water Status of Maize, Sorghum, and Tobacco under Field Conditions. II. At Low Soil Water Potential. NEIL C. TURNER 360
Distribution of Ribosomal Deoxyribonucleic Acid in Subcellular Fractions of Higher Plants. ALAN JAWORSKI AND JOE L. KEY 366
Studies on the Energy-coupling Sites of Photophosphorylation. V. Phosphorylation Efficiencies (P/e_2) Associated with Aerobic Photooxidation of Artificial Electron Donors. DONALD R. ORT AND SEIKICHI IZAWA 370
Deoxyribonucleic Acid Polymerase from Wheat Embryos. Y. Y. MORY, D. CHEN, AND S. SARID 377
Selective Effects of Victorin on Growth and the Auxin Response in *Avena*. ROBERT A. SAFTNER AND MICHAEL L. EVANS 382
Localization of Lead Accumulated by Corn Plants. CARL MALONE, D. E. KOEPPE, AND RAYMOND J. MILLER 388
A Study of the Control of Glycolate Excretion in *Chlorella*. BRIAN COLMAN, A. G. MILLER, AND B. GRODZINSKI 395
Amyloplast Size and Number in Gravity-compensated Oat Seedlings. RAY R. HINCHMAN AND SOLON A. GORDON 398
An Apparent Oligomer of Malate Dehydrogenase from Bean Leaves. WILLIAM HABIG AND DAVID RACUSEN 402
Nitrite Assimilation and Amino Nitrogen Synthesis in Isolated Spinach Chloroplasts. A. C. MAGALHAES, C. A. NEYRA, AND R. H. HAGEMAN 411
Linear Velocity of Cyclic Adenosine 3′,5′-Monophosphate Transport in Corn Coleoptiles. JOHN E. SHERWIN AND SOLON A. GORDON 416
Properties of Protochlorophyllide and Chlorophyll(ide) Holochromes from Etiolated and Greening Leaves. K. W. HENNINGSEN, S. W. THORNE, AND N. K. BOARDMAN 419
Structural and Functional Responses of Wheat Mitochondrial Membranes to Growth at Low Temperatures. R. W. MILLER, I. DE LA ROCHE, AND M. K. POMEROY 426
Precursor-Product Relationships during Sulfate Incorporation into *Porphyridium* Capsular Polysaccharide. J. RAMUS AND S. T. GROVES 434
Nicotinamide Adenine Dinucleotide-dependent Proline Dehydrogenase in *Chlorella*. ALAN D. MCNAMER AND CECIL R. STEWART 440
Red Light Enhancement of the Phototropic Response of Etiolated Pea Stems. BIN G. KANG AND STANLEY P. BURG 445
Characteristics of an Acid Protease from Maize Endosperm. B. M. R. HARVEY AND A. OAKS 449
The Hydrolysis of Endosperm Protein in *Zea mays*. B. M. R. HARVEY AND A. OAKS 453
Distribution and Development of Nitrate Reductase Activity in Germinating Cotton Seedlings. J. W. RADIN 458
Characterization of a H^+ Efflux from Suspension-cultured Plant Cells. MINA L. FISHER AND PETER ALBERSHEIM 464
Control of Free Methionine Production in Wild Type and Ethionine-resistant Mutants of *Chlorella sorokiniana*. MARCIA SLOGER AND LOWELL D. OWENS 469
Chloroplast Response to Low Leaf Water Potentials. III. Differing Inhibition of Electron Transport and Photophosphorylation. R. W. KECK AND J. S. BOYER 474
Amylases from Aleurone Layers and Starchy Endosperm of Barley Seeds. D. E. BILDERBACK 480
The Analysis of Spiral Growth in *Phycomyces* Using a Novel Optical Method. JOSEPH K. E. ORTEGA, JOHN F. HARRIS, AND R. IGOR GAMOW 485
Photosynthesis in the Higher Plant, *Vicia faba*. III. Serine, a Precursor of the Tricarboxylic Acid Cycle. S. SHERRILL KENT, FREDERICK D. PINKERTON, AND GARY A. STROBEL 491
The Galactolipid, Phospholipid, and Fatty Acid Composition of the Chloroplast Envelope Membranes of *Vicia faba*. L. R. O. MACKENDER AND RACHEL M. LEECH 496
Persistence of Red Light Induction in Lettuce Seeds of Varying Hydration. LARS LOERCHER 503
Enzymes Involved in the Postharvest Degradation of Sucrose in *Beta vulgaris* L. Root Tissue. ROGER WYSE 507
Phospholipid Degradation in Frozen Plant Cells Associated with Freezing Injury. SHIZUO YOSHIDA AND AKIRA SAKAI 509
Phycomyces: Electrical Response to Light Stimuli. MARY ANN MOGUS AND JEROME J. WOLKEN 512
Effect of CO_2 Concentration on Glycine and Serine Formation during Photorespiration. F. W. SNYDER AND N. E. TOLBERT 514
Comparison of Plant Cytoplasmic Ribosomal Proteins by Two-Dimensional Polyacrylamide Gel Electrophoresis. N. NAGABHUSHAN, A. GULYAS, AND SAUL ZALIK 516

Number 4. April

Cell Walls of Germinating Uredospores. I. Amino Acid and Carbohydrate Constituents. PAUL TROCHA, J. M. DALY, AND R. J. LANGENBACH 519
Cell Walls of Germinating Uredospores. II. Carbohydrate Polymers. PAUL TROCHA AND J. M. DALY 527
The Chloroplast and Cytoplasmic Ribosomes of *Euglena*. I. Stability of Chloroplast Ribosomes Prepared by an Improved Procedure. STEVEN D. SCHWARTZBACH, GEORGES FREYSSINET, AND JEROME A. SCHIFF 533

The Chloroplast and Cytoplasmic Ribosomes of *Euglena*. II. Characterization of Ribosomal Proteins. GEORGES FREYSSINET AND JEROME A. SCHIFF 543
Lipid Biosynthesis in Green Leaves of Developing Maize. J. C. HAWKE, M. G. RUMSBY, AND RACHEL M. LEECH 555
Relationship of Ribonucleic Acid Metabolism in Embryo and Aleurone to α-Amylase Synthesis in Barley. HENRI A. VAN ONCKELEN, RITA VERBEEK, AND ANWAR A. KHAN 562
Cell Wall and Protoplast Isoperoxidases in Relation to Injury, Indoleacetic Acid, and Ethylene Effects. H. BIRECKA AND A. MILLER 569
The Effect of Light on the Synthesis of Mitochondrial Enzymes in Division-synchronized *Euglena* Cultures. BARRY DAVIS AND M. J. MERRETT 575
Variation in the Carbon Isotope Composition of a Plant with Crassulacean Acid Metabolism. J. C. LERMAN, ELIANE DELEENS, AIMÉ NATO, AND ALEXIS MOYSE 581
Inhibition of Ethylene Evolution in Papaya Pulp Tissue by Benzyl Isothiocyanate. SURESH S. PATIL AND CHUNG-SHIH TANG 585
Chloroplast Reactions of Photosynthetic Mutants in *Zea mays*. C. D. MILES AND D. J. DANIEL 589
Photoperiodism and Enzyme Activity. Towards a Model for the Control of Circadian Metabolic Rhythms in the Crassulacean Acid Metabolism. ORLANDO QUEIROZ AND CLAUDINE MOREL 596
Activation of the *de Novo* Pathway for Pyridine Nucleotide Biosynthesis Prior to Ricinine Biosynthesis in Castor Beans. DAVID F. MANN AND RICHARD U. BYERRUM 603
Photocontrol of Hook Opening in *Cuscuta gronovii* Willd. RONALD F. KUJAWSKI AND F. H. TRUSCOTT 610
The Abolition of the Lag Phase in Greening Cucumber Cotyledons by Exogenous δ-Aminolevulinic Acid. PAUL A. CASTELFRANCO, PETROVIA M. RICH, AND SAMUEL I. BEALE 615
Chloroplast Grana Membrane Carboxyl Groups. Their Involvement in Membrane Association. S. BERG, S. DODGE, D. W. KROGMANN, AND R. A. DILLEY 619
Isolation, Characterization, and Partial Purification of a Reduced Nicotinamide Adenine Dinucleotide Phosphate-dependent Dihydroxyacetone Reductase from the Halophilic Alga *Dunaliella parva*. AMI BEN-AMOTZ AND MORDHAY AVRON 628
Nitrate Reductase Activity and Protein Concentration of Two *Populas* Clones. GARY F. DYKSTRA 632
Effects of Cycloheximide upon Formation of Ribonucleic Acid, Cytidylic and Uridylic Acids. CLEON ROSS 635
Senescence of Attached Bean Leaves Accelerated by Sprays of Silicone Oil Antitranspirants. P. M. NEUMANN 638
Effect of Noise on the Mathematical Parameters that Describe Isothermal Seed Germination. GAYLORD T. HAGESETH 641
Levels of (±) Abscisic Acid and Xanthoxin in Spinach under Different Environmental Conditions. JAN A. D. ZEEVAART 644
Dehydroipomeamarone as an Intermediate in the Biosynthesis of Ipomeamarone, a Phytoalexin from Sweet Potato Root Infected with *Ceratocystis fimbriata*. ITARO OGUNI AND IKUZO URITANI 649
Studies on the Respiratory Properties of Mitochondria Isolated from Developing Winter Wheat Seedlings. M. K. POMEROY 653
Dual Effects of Ethylene on Potato Dormancy and Sprout Growth. IRENA RYLSKI, LAWRENCE RAPPAPORT, AND HARLAN K. PRATT 658
Inhibition of Phosphorus and Water Passage Across Intact Roots by Polyethylene Glycol and Phenylmercuric Acetate. FRED H. EMMERT 663
The Influence of Benzimidazole on the Gametophyte of *Thelypteris felix-mas*. JAMES J. DYAR AND JOAN SHADE 666

Number 5. May

Turnover of Cell Wall Polysaccharides in Elongating Pea Stem Segments. JOHN M. LABAVITCH AND PETER M. RAY 669
Stachyose: an Early Product of Photosynthesis in Squash Leaves. GENE A. BEITLER AND JOHN E. HENDRIX 674
Maize Mitochondria: Purification and Characterization of Ribosomes and Ribosomal Ribonucleic Acid. D. R. PRING 677
Host-Pathogen Interactions. VII. Plant Pathogens Secrete Proteins which Inhibit Enzymes of the Host Capable of Attacking the Pathogen. PETER ALBERSHEIM AND BARBARA S. VALENT 684
Use of Protein in Extraction and Stabilization of Nitrate Reductase. L. E. SCHRADER, D. A. CATALDO, AND D. M. PETERSON 688
Chloramphenicol as an Energy Transfer Inhibitor in Spinach Chloroplasts. ONNOP WARA-ASWAPATI AND J. W. BRADBEER 691
Isoaccepting Transfer Ribonucleic Acids during Chilling Stress in Soybean Seedling Hypocotyls. JIU-SHERNG YANG AND GREGORY N. BROWN 694
The Role of Galactolipids in Spinach Chloroplast Lamellar Membranes. I. Partial Purification of a Bean Leaf Galactolipid Lipase and Its Action on Subchloroplast Particles. MARK M. ANDERSON, RICHARD E. MCCARTY, AND ELIZABETH A. ZIMMER 699
Freezing of Nonwoody Plant Tissue. I. Effect of Rate of Cooling on Damage to Frozen Beet Root Sections. BERNARD J. FINKLE. E. SA B. PEREIRA, AND M. S. BROWN 705
Freezing of Nonwoody Plant Tissue. II. Cell Damage and the Fine Structure of Freezing Curves. M. S. BROWN, E. SA B. PEREIRA, AND BERNARD J. FINKLE 709

The Use of an Enzyme Electrode in the Analysis of Indole-3-acetic Acid Oxidase Activity in *Avena*. WILLIAM H. MCCREIGHT AND JAMES E. PERLEY 712
Kinetics of Activation of Nicotinamide Adenine Dinucleotide Kinase by Phytochrome—Far Red-absorbing Form. TAKAFUMI TEZUKA AND YUKIO YAMAMOTO 717
Cation Penetration through Isolated Leaf Cuticles. JAMES C. MCFARLANE AND WADE L. BERRY 723
Phenolic Acids in Wheat Coleoptile Cell Walls. F. W. WHITMORE 728
Cellulase and Abscission in the Red Kidney Bean (*Phaseolus vulgaris*). PHILIP D. REID, HEATHER G. STRONG, FRANCIS LEW, AND LOWELL N. LEWIS 732
Morphogenesis in *Selaginella*. II. Auxin Transport in the Root (Rhizophore). Z. S. WOCHOK AND I. M. SUSSEX 738
Proteins of Soybean Seeds. I. Isolation and Characterization of the Major Components. J. E. HILL AND R. W. BREIDENBACH 742
Proteins of Soybean Seeds. II. Accumulation of the Major Protein Components during Seed Development and Maturation. J. E. HILL AND R. W. BREIDENBACH 747
Cholinesterases from Plant Tissues. III. Distribution and Subcellular Localization in *Phaseolus aureus* Roxb. R. A. FLUCK AND M. J. JAFFE 752
An Apparent Cellulase Complex in Tomato (*Lycopersicon esculentum* L.) Fruit. FRANCIS E. SOBOTKA AND DAVID A. STELZIG 759
Energies of Freezing and Frost Desiccation. C. R. OLIEN 764
Pitfalls in Using Sodium Hypochlorite as a Seed Disinfectant in ^{14}C Incorporation Studies. AREF A. ABDUL-BAKI 768
Microelectrodes Suitable for Use in Cells with High Hydrostatic Pressure. MILDRED C. ERNAU 772
Boron-induced Bioelectric Field Change in Mung Bean Hypocotyl. TAKUMA TANADA 775
Polypeptide Composition of Photosynthetic Membranes from *Chlamydomonas reinhardi* and *Anabaena variabilis*. SIGRID M. KLEIN AND LEO P. VERNON 777
Rapid Increase in Adenosine 5′-Triphosphate during Early Wheat Embryo Germination. RALPH L. OBENDORF AND ABRAHAM MARCUS 779

Number 6. June

Effects of Red and Far Red Light on the Initiation of Cold Acclimation in *Cornus stolonifera* Michx. J. S. MCKENZIE, C. J. WEISER, AND M. J. BURKE 783
Photosynthetic Intermediates, The Warburg Effect, and Glycolate Synthesis in Isolated Spinach Chloroplasts. J. MICHAEL ROBINSON AND MARTIN GIBBS 790
Effect of Carbon Dioxide and Ethylene on Tuberization of Isolated Potato Stolons Cultured *in Vitro*. ANGEL M. MINGO-CASTEL, FAYEK B. NEGM, AND O. E. SMITH 798
Citrate Synthetase in Mitochondria and Glyoxysomes of Maize Scutellum. DANIELA BARBARESCHI, GIOVANNA P. LONGO, ORIETTA SERVETTAZ, TULLIO ZULIAN, AND CLAUDIO P. LONGO 802
Prechilling of *Xanthium strumarium* L. Reduces Net Photosynthesis and, Independently, Stomatal Conductance, While Sensitizing the Stomata to CO_2. B. DRAKE AND K. RASCHKE 808
The *Azolla*, *Anabaena azollae* Relationship. I. Initial Characterization of the Association. GERALD A. PETERS AND BERGER C. MAYNE 813
The *Azolla*, *Anabaena azollae* Relationship. II. Localization of Nitrogenase Activity as Assayed by Acetylene Reduction. GERALD A. PETERS AND BERGER C. MAYNE 820
Improvements of the Nitrite Color Development in Assays of Nitrate Reductase by Phenazine Methosulfate and Zinc Acetate. R. L. SCHOLL, J. E. HARPER, AND R. H. HAGEMAN 825
Phosphoenolpyruvate Carboxylase from Spinach Leaf Tissue. Inhibition by Sulfite Ion. S. K. MUKERJI AND S. F. YANG 829
Inactivation of Pea Leaf Chloroplastic and Cytoplasmic Glucose 6-Phosphate Dehydrogenases by Light and Dithiothreitol. LOUISE E. ANDERSON, TOH-CHIN LIM NG, AND KYUNG-EUN YOON PARK 835
The Respiratory Chain of Plant Mitochondria. XVI. Interaction of Cytochrome b_{562} with the Respiratory Chain of Coupled and Uncoupled Mung Bean Mitochondria: Evidence for Its Exclusion from the Main Sequence of the Chain. BAYARD T. STOREY 840
The Respiratory Chain of Plant Mitochondria. XVII. Flavoprotein-Cytochrome b_{562} Interaction in Antimycin-treated Skunk Cabbage Mitochondria. BAYARD T. STOREY 846
Influence of *Opaque-2* and *Floury-2* Genes on Formation of Proteins in Particulates of Corn Endosperm. D. D. CHRISTIANSON, U. KHOO, H. C. NIELSEN, AND J. S. WALL 851
Relationship between the Level of Adenine Nucleotides and the Carboxylation Activity of Illuminated Isolated Spinach Chloroplasts. A Study with Antimycin A. MYROSLAWA MIGINIAC-MASLOW AND MARIE-LOUISE CHAMPIGNY 856
Effect of Water Stress on Ethylene Production by Detached Leaves of Valencia Orange (*Citrus sinensis* Osbeck). S. BEN-YEHOSHUA AND B. ALONI 863
Isolation and Characterization of Microbodies from the Alga *Chlorogonium elongatum*. HELMUT STABENAU AND HARRY BEEVERS 866
Isolation of Intact Plastids from a Range of Plant Tissues. BENJAMIN J. MIFLIN AND HARRY BEEVERS 870
Seed Aging: Chromosome Stability and Extended Viability of Seeds Stored Fully Imbibed. T. A. VILLIERS 875

The Effect of Light on the Tricarboxylic Acid Cycle in Green Leaves. I. Relative Rates of the Cycle in the Dark and the Light. E. A. CHAPMAN AND D. GRAHAM 879
The Effect of Light on the Tricarboxylic Acid Cycle in Green Leaves. II. Intermediary Metabolism and the Location of Control Points. E. A. CHAPMAN AND D. GRAHAM 886
The Effect of Light on the Tricarboxylic Acid Cycle in Green Leaves. III. A Comparison between Some C_3 and C_4 Plants. E. A. CHAPMAN AND C. B. OSMOND 893
Postharvest Response of Avocado Fruits of Different Maturity to Delayed Ethylene Treatments. I. ADATO AND S. GAZIT 899
Inhibition of Cuticular Lipid Biosynthesis in *Pisum sativum* by Thiocarbamates. P. E. KOLATTUKUDY AND LINDA BROWN 903
Endogenous Rhythmic Activity of Photosynthesis, Transpiration, Dark Respiration, and Carbon Dioxide Compensation Point of Peanut Leaves. J. E. PALLAS, JR., Y. B. SAMISH, AND C. M. WILLMER 907
Vein Loading: The Role of the Symplast in Intercellular Transport of Carbohydrate between the Mesophyll and Minor Veins of Tobacco Leaves. DOMINIC A. CATALDO 912
Corn Mitochondrial Swelling and Contraction—an Alternate Interpretation. CARL MALONE, D. E. KOEPPE, AND RAYMOND J. MILLER 918
A Direct Comparison between Circadian and Noncircadian Rhythms in *Neurospora crassa*. JERRY F. FELDMAN AND MARIAN N. HOYLE 928
Differential Effects of Ethylene on Pith Peroxidase of Intact Tobacco Plants and Excised Tissue. WHITNEY R. ADAMS, JR., AND ARTHUR W. GALSTON 931
Effect of Carbon Dioxide on Nitrate Accumulation and Nitrate Reductase Induction in Corn Seedlings. A. C. PURVIS, D. B. PETERS, AND R. H. HAGEMAN 934
Localization of Stem Elongation Control in *Cucumis sativus* L. M. S. SANDHU, R. G. LOCKARD, AND M. J. KASPERBAUER 942

Subject Index

A

Abscisic acid
  leaf water potential, 125
  xanthoxin in spinach, 644
Abscission
  in red kidney bean, 732
  polygalacturonase from citrus leaf, 312
Acclimation, cold, initiation of in dogwood, 783
Acer saccharum, energy charge in seeds, 91
Acetylene, reduction by *Rhizobium*-soybean cell associations, 67
S-Acyl glutathione thioesterase, 216
Adenine nucleotides, carboxylation activity of spinach chloroplasts, 856
Adenosine monophosphate, cyclic, transport in corn coleoptiles, 416
Adenosine 5′-phosphofluoridate formation in barley seeds, 144
Adenosine triphosphate
  during early wheat germination, 779
  phytochrome control, 76
Adenosine triphosphate sulfurylase forms in beet hypocotyl, 180
Adenyl cyclase in barley seeds, 144
Alanine, ^{14}C translocation after application of to leaves, 21
Aleurone
  barley, RNA metabolism and α-amylase synthesis, 562
  barley seed, amylases, 480
Algae
  green, lactate metabolism, 167
  halophilic, $NADP^+$-dependent dihydroxyacetone reductase, 628
  polypeptides of photosynthetic membranes, 777
Alkaloid changes in germinating tobacco seeds, 73
Amino acids
  low temperature and metabolism of in poplar, 319
  uredospore cell walls, 519
Aminolevulinic acid
  accumulation in greening tissue, 291
  formation from labeled precursors in greening tissues, 297
  lag phase abolition, 615
Amino nitrogen synthesis in spinach chloroplasts, 411
Amylase
  synthesis in barley and RNA metabolism in embryo and aleurone, 562
  of barley seeds, 480
Amyloplast, size and number in gravity-compensated oat seedlings, 398
Antimycin, flavoprotein-cytochrome b_{562} interaction in skunk cabbage mitochondria treated with, 846
Antimycin A, carboxylation activity and adenylates in spinach chloroplasts, 856
Apricot, cation penetration through leaf cuticles, 723
Arginine, low temperature and metabolism in poplar, 319
Auxin: *see also* Indoleacetic acid
  soybean RNA polymerase, 110
  transport in *Selaginella* rhizophore, 738
  victorin effects on response in oat, 382
Avocado
  postharvest response of fruit to ethylene, 899
  water loss and ripening, 45
Azolla, *Anabaena azollae* relationship, 813, 820

B

Barley
  adenosine 5′-phosphorofluoridate in seeds, 144
  amylases of seeds, 480
  RNA metabolism and α-amylase synthesis, 562
Bean
  accelerated leaf senescence, 638
  castor
    catalase activity in glyoxysomes, 276
    pyridine nucleotide and ricinine biosynthesis, 603
  cholinesterase, 752
  induction of porphyrins by chelators, 206
  malate dehydrogenase from leaves, 402
  mung
    boron-induced bioelectric field change in hypocotyl, 775
    interaction of cytochrome b_{562} with respiratory chain of mitochondria, 840
  phytochrome control of ATP levels, 76
  red kidney, cellulase and abscission, 732
Beet
  ATP sulfurylase in hypocotyl, 180
  rate of cooling and frozen root damage, 705
  sucrose degradation in root, 507
Benzimidazole, fern gametophyte, 666
Benzyl isothiocyanate, ethylene inhibition in papaya, 585
Bicarbonate, photophosphorylation, 220
Bioluminescence, circadian rhythm, 337
Boron, bioelectric field change in bean hypocotyl, 775
Bud, bean, phytochrome control of ATP levels, 76

C

Cabbage, skunk, flavoprotein-cytochrome b_{562} interaction in mitochondria, 846
Callus, soybean, nitrogenase in, 88
Carbohydrates
  transport in tobacco leaves, 912
  uredospore cell walls, 519, 527
Carbon, ^{14}C-labeled, translocation to leaves, 21
Carbon dioxide
  compensation point in peanut leaves, 907
  fixation by spinach chloroplasts, 140
  glycine and serine formation during photorespiration, 514
  nitrate accumulation and nitrate reductase induction in corn seedlings, 934
  tuberization of potato stolons, 798
Carbon isotope, Crassulacean acid metabolism plant, 581
Carboxylation activity, adenine nucleotides in spinach chloroplasts, 856
Carboxyl groups, chloroplast grana membrane, 619
Carrot
  nonelectrolyte fluxes in root cells, 307
  synthesis of fatty acids and 6-methoxy mellein in root, 331
Catalase, castor bean glyoxysomes, 276
Cation penetration through leaf cuticles, 723
Cellulase
  complex in tomato fruit, 759
  in red kidney bean, 732
Ceratocystis fimbriata
  sweet potato root infected with, 649
  synthesis of fatty acids and 6-methoxy mellein in carrot root, 331
Chelators
  induction of porphyrins by, 206
  phloem exudation, 96
Chloramphenicol as energy transfer inhibitor in spinach chloroplasts, 691
Chlorella
  control of free methionine production, 469
  glycolate excretion, 395
  hexose transport, 14
  inhibition of sterol biosynthesis by triparanol, 244
  proline dehydrogenase, 440
Chlorogonium elongatum, microbodies from, 866
Chloroplasts
  corn, photosynthetic mutants, 589
  membrane carboxyl groups, 619
  potentiation in a chlorophyll mutant o peanut, 233
  spinach
    adenine nucleotides and carboxylation activity, 856
    bicarbonate and photophosphorylation, 220
    chloramphenicol as energy transfer inhibitor, 691
    CO_2 fixation, 140
    galactolipids in lamellar membranes, 699
    nitrite assimilation and amino nitrogen synthesis, 411
    ozone and photosynthesis, 32
    phosphoribulokinase, 136
    RuDP carboxylase from, 39
    Warburg effect and glycolate synthesis, 790
  sunflower, response to low leaf water potentials, 474
  Vicia faba, envelope membranes, 496
Cholinesterase, distribution and subcellular localization, 752
Chromatin from polypeptide-treated pea pods, 52
Chromosome stability and seed aging, 875
Circadian rhythms

control in Crassulacean acid metabolism, 596
in *Neurospora*, 154, 928
K^+ in *Gonyaulax polyedra*, 337
peanut leaves, 902
Citrate synthetase in corn scutellum, 802
Citrus fruit, polygalacturonase from leaf, 312
Clover
flavin content and symbiosis, 198
strawberry, ethylene-induced tropism, 80
Cold: *see also* Freezing
initiation of acclimation, 783
Coleoptile
corn, cAMP transport, 416
oat, activation of glycosidases, 224
wheat, phenolic acids in cell walls, 728
Corn
acid protease from endosperm, 449
cAMP transport in coleoptiles, 416
chloroplast reactions of photosynthetic mutants, 589
citrate synthetase in scutellum, 802
CO_2 effect on nitrate accumulation and nitrate reductase induction in seedlings, 934
hydrolysis of endosperm protein, 453
lead localization, 388
lipid biosynthesis in developing leaves, 555
mitochondrial swelling and contraction, 918
opaque-2 and floury-2 genes and protein formation in endosperm particulates, 851
red light-mediated ribosome activation, 28
ribosomal RNA in mitochondria, 677
stomatal behavior and water status, 360
Cotton
nitrate reductase in seedlings, 458
utilization of nucleoside diphosphate glucoses in developing fibers, 149
Cotyledon, cucumber, lag phase abolition, 615
Crassulacean acid metabolism, photoperiodism and enzyme activity, 596
Crassulacean acid metabolism plant, carbon isotope composition, 581
Cucumber
ion transport in roots, 158
lag phase abolition by ALA, 615
localization of stem elongation control, 942
phytochrome, temperature, and seed germination, 114
Cycloheximide, formation of RNA cytidylic and uridylic acids, 635
Cytochrome b_{562}
interaction with flavoprotein in cabbage mitochondria, 846
interaction with respiratory chain of bean mitochondria, 840

D

De-etiolation, *ent*-kaurene biosynthesis in pea, 5
Dehydroipomeamarone as intermediate in ipomeamarone biosynthesis, 649
Deoxyribonucleic acid, ribosomal, in higher plants, 366
Deoxyribonucleic acid polymerase from wheat embryos, 377
Desiccation, frost, 764
Deuterium oxide, winter rye ultrastructure, 128
Diallate, sicklepod surface wax response, 269
Dihydroxyacetone reductase, $NADP^+$-dependent, from alga, 628
Dithiothreitol, glucose-6-P dehydrogenase inactivation, 835
Dodder, photocontrol of hook opening, 610
Dogwood, initiation of cold acclimation, 783
Dormancy, ethylene effects, 658
Dunaliella parva, $NADP^+$dependent dihydroxyacetone reductase, 628

E

Embryo
barley, RNA metabolism and α-amylase synthesis, 562
wheat, DNA polymerase, 377
Endosperm
barley, amylases, 480
castor bean, catalase activity in glyoxysomes, 276
corn
acid protease from, 449
hydrolysis of protein, 453
opaque-2 and floury-2 genes and protein formation in particulates, 851
Energy charge in *Acer* seeds, 91
Enzymes, mitochondrial, synthesis in *Euglena*, 575
Epicotyl, pea, phytochrome action in mitochondria, 343
Ethanol, circadian rhythm in *Gonyaulax polyedra*, 337
Ethionine, control of free methionine in *Chlorella* mutants resistant to, 469
Ethrel, synthesis of fatty acids and 6-methoxy mellein in carrot root, 331
Ethylene
cell wall and protoplast isoperoxidases, 569
IAA conjugation, 164
inhibition by benzyl isothiocyanate, 585
postharvest response of avocado fruit, 899
potato dormancy and sprout growth, 658
tobacco pith peroxidase, 931
tropism of strawberry clover stolons, 80
tuberization of potato stolons, 798
water loss in avocado fruits, 45
water stress and production of by orange leaves, 863
Euglena
chloroplast and cytoplasmic ribosomes, 533, 543
light and mitochondrial enzymes, 575
plastid loss, 284

F

Fatty acids
of *Vicia faba* chloroplast envelope membranes, 496
synthesis in carrot root, 331
Fern, benzimidazole and gametophyte, 666
Flavin content in clover and symbiosis, 198
Flavoprotein interaction with cytochrome b_{562} in cabbage mitochondria, 846
Food utilization in lettuce seeds, 64
Freezing: *see also* Cold
cell damage and fine structure of freezing curves, 709
energy of, 764
phospholipid degradation, 509
rate of cooling and damage to beet root, 705
Fruit, tomato, cellulase complex, 759

G

Galactolipids
in spinach chloroplast lamellar membranes, 699
of *Vicia faba* chloroplast envelope membranes, 496
Gametophyte, fern, benzimidazole, 666
Gas exchange of prechilled *Xanthium* leaves, 808
Gas mixtures, apparatus to produce, 11
Germination
alkaloid changes in tobacco seeds, 73
ATP in wheat embryo, 779
GA and phytochrome action on lettuce seeds, 266
isothermal, noise effects on parameters, 641
nitrate reductase in cotton seedlings, 458
phytochrome and temperature, 114
Gibberellin
energy charge in *Acer* seeds, 91
lettuce seed germination, 266
response of watermelon seedlings, 325
yellow-green 6 gene in tomato, 192
Glucan, heat effect on synthesis, 118
Glucose 6-phosphate dehydrogenase inactivation by light and dithiothreitol, 835
Glycine, effect of CO_2 concentration on formation of during photorespiration, 514
Glycolate
excretion in *Chlorella*, 395
synthesis in spinach chloroplasts, 790
Glycosidase activation by IAA and H^+, 224
Glyoxysomes
castor bean, catalase, 276
corn scutellum, citrate synthetase, 802
Gonyaulax polyedra, circadian rhythm, 337
Gravity compensation, amyloplast size and number in oat seedlings, 398
Growth
effects of victorin on in oat, 382
heat shock effect, 118
Neurospora, 154
spiral, in *Phycomyces*, 485
Growth rate, *ent*-kaurene biosynthesis in pea, 5

H

Heat, glucan synthesis, 118
Helminthosporium, host-specific toxins, 250
Hexose transport in *Chlorella*, 14
Holochromes, protochlorophyllide and chlorophyll(ide), 419
Host-pathogen interactions, 684
Hydration, red light induction in lettuce seeds, 503
Hydrogen ion
activation of glycosidases, 224
efflux from suspension-cultured cells, 464
Hydroperoxidase isomerase, intracellular distribution, 1
Hypocotyl
bean, boron-induced bioelectric field change, 775
beet, ATP sulfurylase, 180
soybean, auxin and RNA polymerase, 110

I

Indoleacetic acid
activation of glycosidases, 224
cell wall and protoplast isoperoxidases, 569
ethylene and conjugation of, 164
water permeability of pea, 229
Indoleacetic acid oxidase, enzyme electrode in analysis of activity in oat, 712
Ipomeamarone biosynthesis, 649
Iron, induction of porphyrins by chelators of, 206
Isoperoxidase, cell wall and protoplast, injury, IAA, and ethylene effects, 569

K

Kaempferol, inhibition of photophosphorylation, 304
Kaurene biosynthesis in pea, 5
Kinetin
energy charge in *Acer* seeds, 91
polar transport in radish, 348
water status of salt-stressed plants treated with, 241

L

Lactate metabolism in green algae and lower land plants, 167
Lag phase abolition by ALA, 615
Lamellar membranes, spinach chloroplast, galactolipids, 699
Lead, localization in corn, 388
Leaf
apricot, cation penetration through cuticles, 723
bean
accelerated senescence, 638
induction of porphyrins by chelators, 206
malate dehydrogenase from, 402
beet, ATP sulfurylase, 180
corn, lipid biosynthesis, 555
mung bean, effect of light on tricarboxylic acid cycle, 879, 886
orange, water stress and ethylene production, 863
pea, glucose-6-P dehydrogenase inactivation, 835
peanut, rhythmic activity, 907
protochlorophyllide and chlorophyll(ide) holochromes from, 419
spinach, PEP carboxylase, 829
squash, stachyose from photosynthesis, 674
sunflower, ^{14}C translocation, 21
tobacco
kinetics of sugar uptake, 912
soluble peroxidase in fluid from intercellular spaces, 317
water potential and ABA, 125
Xanthium
prechilling and gas exchange, 808
rhythms of movement, 176
Lettuce
food utilization in seeds, 64
GA and phytochrome action on seed germination, 266
red light induction in partially hydrated seeds, 503
Light
electrical response of *Phycomyces* to, 512
glucose-6-P dehydrogenase inactivation, 835
mitochondrial enzyme synthesis in *Euglena*, 575
pea stem elongation, 279
red
induction in lettuce seeds, 503
phototropism, 445
tricarboxylic acid cycle in green leaves, 879, 886, 893
Lipids
biosynthesis in corn leaves, 555
cuticular, thiocarbamates, 903
heat effect on synthesis, 118

M

Magnetic field, growth rate and circadian rhythm of *Neurospora*, 154
Maize: *see* Corn
Malate, oxidation by mitochondria, 104
Malate dehydrogenase from bean leaves, 402
Membrane resistance, single intracellular electrode, 122
Metal ions, effect on phytochrome decay, 352
Methionine, free, control of in *Chlorella*, 469
6-Methoxy mellein synthesis in carrot root, 331
Microbodies from an alga, 866
Microelectrode for cells with high hydrostatic pressure, 772
Mitochondria
corn
ribosomal RNA, 677
swelling and contraction, 918
corn scutellum, citrate synthetase, 802
malate and NADH oxidation, 104
mung bean, interaction of cytochrome b_{562} with respiratory chain, 840
pea, phytochrome-dependent reduction of nicotinamide nucleotides, 343
respiratory chain, 840, 846
skunk cabbage, flavoprotein-cytochrome b_{562} interaction in, 846
wheat
respiratory properties, 653
temperature adaptation, 426

N

Neurospora crassa
circadian and noncircadian rhythms, 928
lack of effect of magnetic fields on growth rate and circadian rhythm, 154
Nicotinamide adenine dinucleotide
proline dehydrogenase in *Chlorella*, 440
reduced, oxidation by mitochondria, 104
Nicotinamide adenine dinucleotide kinase activation by Pfr, 717
Nicotinamide nucleotides, phytochrome-dependent reduction in pea mitochondria, 343
Nitrate, CO_2 effect on accumulation in corn seedlings, 934
Nitrate reductase
activity in *Populus* clones, 632
CO_2 effect on induction in corn seedlings, 934
improved assay, 825
in cotton seedlings, 458
use of protein in extraction and stabilization of, 688
Nitrite assimilation by spinach chloroplasts, 411
Nitrogenase in soybean callus culture, 88
Noise, isothermal germination parameters, 641
Nucleoside diphosphate glucose utilization in developing cotton fibers, 149

O

Oat
activation of glycosidases by IAA and H^+, 224
gravity-compensated, amyloplast size and number, 398
IAA oxidase activity, 712
victorin effects on growth and auxin response, 382
Orange, water stress and ethylene production by leaves, 863
Organelles from soybean suspension cultures, 261
Ozone inhibition of photosynthetic capacity of isolated chloroplasts, 32

P

Papaya, ethylene inhibition by benzyl isothiocyanate, 585
Pea
ent-kaurene biosynthesis, 5
glucose-6-P dehydrogenase inactivation, 835
IAA and water permeability, 229
light-controlled stem elongation, 279
phytochrome action in mitochondria, 343
polypeptides as pisatin inducers, 52
red light and phototropism, 445
thiocarbamates and cuticular lipids, 903
turnover of cell wall polysaccharides in elongating stem segments, 669
Peanut
potentiation in a chlorophyll mutant, 233
protein synthesis in cell culture, 83
rhythmic activity, 907
Peroxidase
soluble, in fluid from tobacco leaf intercellular spaces, 317
tobacco pith, ethylene effects, 931
Phenazine methosulfate, improved nitrate reductase assay, 825
Phenolic acid in wheat coleoptile cell walls, 728
Phenylmercuric acetate inhibition of phosphorus and water transport, 663
Phloem, chelating agents and exudation of, 96
Phosphatidylethanolamine biosynthesis by enzyme preparations, 171
Phosphoenolpyruvate carboxylase from spinach leaf, 829
Phospholipid
degradation in frozen plant cells, 509
of *Vicia faba* chloroplast envelope membranes, 496
Phosphon, wound healing in potato tuber, 187
Phosphoribulokinase of whole chloroplasts, 136
Phosphorus transport across roots, inhibition by polyethylene glycol and phenylmercuric acetate, 663
Photoperiod
enzyme activity, 596
sicklepod surface wax response, 269
Photophosphorylation
bicarbonate, 220
energy-coupling sites, 370

inhibition by kaempferol, 304
low leaf water potentials, 474
Photorespiration, effect of CO_2 concentration on glycine and serine formation, 514
Photosynthesis
in squash leaves, stachyose from, 674
in *Vicia faba*, 491
ozone and isolated chloroplasts, 32
rhythmic activity in peanut leaves, 907
Phototropism, red light, 445
Phycomyces
electrical response to light, 513
spiral growth, 485
Phytochrome
control of ATP levels, 76
effect of metal ions on stability, 352
far red-absorbing, activation of NAD kinase, 717
lettuce seed germination, 266
reduction of nicotinamide nucleotides in pea mitochondria, 343
temperature and seed germination, 114
Pisatin, polypeptides as inducers, 52
Plastids
intact, isolation from a range of plant tissues, 870
loss in *Euglena*, 284
Polyacrylamide gel electrophoresis, plant cytoplasmic ribosomal proteins, 516
Polyethylene glycol inhibition of phosphorus and water transport, 663
Polygalacturonase, citrus leaf, 312
Polymerase, soybean RNA, 110
Polymers, carbohydrate, uredospore cell walls, 527
Polypeptides
of photosynthetic membranes from algae, 777
pisatin induction, 52
Polysaccharide
cell wall, turnover in elongating pea stem segments, 669
Porphyridium, sulfation, 434
Poplar, low temperature and arginine metabolism, 319
Populus, nitrate reductase activity and protein concentration of clones, 632
Porometer, digital diffusion, 47
Porphyridium, sulfation of polysaccharide, 434
Porphyrin, induction of synthesis in bean leaves by chelators of iron, 206
Potassium, circadian rhythm in content of in *Gonyaulax polyedra*, 337
Potassium salt, transport of ions from by cucumber roots, 158
Potato
CO_2, C_2H_4, and tuberization, 798
effects of ethylene on dormancy and sprout growth, 658
Phosphon inhibition, 187
sweet, ipomeamarone biosynthesis, 649
Proline dehydrogenase in *Chlorella*, 440
Protease, acid, from maize endosperm, 449
Proteins
concentration in *Populus* clones, 632
corn endosperm, hydrolysis, 453
cytoplasmic ribosomal, 516
extraction and stabilization of nitrate reductase, 688
influence of mutant genes on formation of in corn endosperm particulates, 851
of soybean seeds, 742, 747
ribosomal, of *Euglena*, 543
secreted by plant pathogens, 684
synthesis in peanut cell culture, 83
Pyridine nucleotide biosynthesis in castor beans, 603

R

Radish, polar transport of kinetin, 348
Red light: *see* Light, red
Reprints, new rapid, 324
Rhizobium
acetylene reduction, 67
symbiosis and flavin content in clover, 198
Rhizophore, *Selaginella*, auxin transport, 738
Ribonucleic acid
isoaccepting transfer, in chilled soybean seedling hypocotyls, 694
relationship of metabolism of in embryo and aleurone to α-amylase synthesis in barley, 562
ribosomal, corn mitochondria, 677
synthesized by chromatin-bound polymerase, 110
Ribonucleic acid, cytidylic and uridylic acids, effects of cycloheximide on formation of, 635
Ribosomes
chloroplast and cytoplasmic, of *Euglena*, 533, 543
comparison of proteins by polyacrylamide gel electrophoresis, 516
corn, red light-mediated activation, 28
corn mitochondria, 677
Ribulose diphosphate carboxylase from spinach chloroplasts with an *in vivo* $Km[CO_2]$, 39
Ricinine biosynthesis in castor beans, 603
Ripening, water loss in avocado fruits, 45
Root
beet
freezing damage, 705
sucrose degradation, 507
carrot
nonelectrolyte fluxes and compartmentation in cells, 307
synthesis of fatty acids and 6-methoxy mellein, 331
cucumber, ion transport, 158
phosphorus and water transport, 663
Selaginella, auxin transport, 738
sweet potato, ipomeamarone biosynthesis, 649
Rye, winter, deuterium oxide effect on ultrastructure, 128

S

Salt stress, water status and kinetin treatment, 241
Scutellum, corn, citrate synthetase in, 802
Seed
Acer, energy charge in, 91
aging and chromosome stability, 875
barley
amylases of, 480
formation of adenosine 5′-phosphorofluoridate, 144
cucumber, phytochrome, temperature, and germination, 114
lettuce
food utilization, 64
GA and phytochrome effect on germination, 266
red light induction, 503
sodium hypochlorite as disinfectant, 768
soybean, proteins in, 742, 747
tobacco, alkaloid changes during germination, 73
Seedling
corn
CO_2 effect on nitrate accumulation and nitrate reductase induction, 934
red light-mediated ribosome activation, 28
cotton, nitrate reductase in, 458
dodder, photocontrol of hook opening, 610
oat, amyloplast size and number in gravity-compensated, 398
soybean, tRNA in chilled hypocotyls, 694
tobacco, steryl glycoside in, 131
watermelon, response to GA, 325
winter wheat, respiratory properties of mitochondria, 653
Selaginella, auxin transport in rhizophore, 738
Senescence, accelerated, bean leaf, 638
Serine
effect of CO_2 concentration on formation of during photorespiration, 514
photosynthesis in *Vicia faba*, 491
Sicklepod, wax response to photoperiod and diallate, 269
Silicone oil antitranspirants, accelerated bean leaf senescence, 638
Sodium hypochlorite as seed disinfectant in ^{14}C incorporation studies, 768
Sorghum, stomatal behavior and water status, 360
Soybean
acetylene reduction, 67
auxin and RNA polymerase, 110
nitrogenase in callus culture, 88
organelles from suspension cultures, 261
proteins of seeds, 742, 747
tRNA in chilled seedling hypocotyls, 694
Spinach
ABA and xanthoxin, 644
adenine nucleotides and carboxylation activity of chloroplasts, 856
bicarbonate and photophosphorylation in chloroplasts, 220
chloramphenicol as energy transfer inhibitor in chloroplasts, 691
CO_2 fixation in chloroplasts, 140
galactolipids in chloroplast lamellar membranes, 699
nitrite assimilation and amino nitrogen synthesis in chloroplasts, 411
ozone and photosynthesis in chloroplasts, 32
PEP carboxylase from leaf, 829
phosphoribulokinase of whole chloroplasts, 136
RuDP carboxylase from chloroplasts, 39
Warburg effect and glycolate synthesis in chloroplasts, 790
Squash, stachyose from leaf photosynthesis, 674
Stachyose, squash leaf photosynthesis, 674
Stem
cucumber, localization of elongation control, 942
pea
light-controlled elongation, 279
red light and phototropism, 445

turnover of cell wall polysaccharides, 669
Sterol, inhibition of biosynthesis in *Chlorella* by triparanol, 244
Steryl glycoside in tobacco seedlings, 131
Stolon, strawberry clover, ethylene-induced tropism, 80
Stomata, responses to light and water, 360
Stress
chilling, tRNA in soybean seedling hypocotyls, 694
Stress
water
ethylene production and ripening in avocado fruits, 45
ethylene production by orange leaves, 863
Sucrose degradation in beet root, 507
Sulfate incorporation into *Porphyridium* polysaccharide, 434
Sulfite ion inhibition of PEP carboxylase, 829
Sunflower
chloroplast response to low leaf water potentials, 474
^{14}C translocation to leaves, 21
Symbiosis, flavin content in clover, 198
Symplast, carbohydrate transport in tobacco leaves, 912

T

Temperature
low
effect on amino acid metabolism in wintering poplar, 319
responses of wheat mitochondrial membranes, 426
phytochrome control of seed germination, 114
Thiocarbamates, inhibition of cuticular lipid biosynthesis in pea, 903
Tobacco
alkaloid changes in germinating seeds, 73
ethylene effects on pith peroxidase, 931
kinetics of sugar uptake by leaves, 912
soluble peroxidase in fluid from leaf intercellular spaces, 317
steryl glycoside in seedlings, 131
stomatal behavior and water status, 360
Tomato
cellulase complex in fruit, 759
yellow-green 6 gene, 192
Toxins, host-specific, of *Helminthosporium*, 250
Translocation of radioactive carbon to leaves, 21
Tricarboxylic acid cycle, light effect on in green leaves, 879, 886, 893
Triparanol inhibition of sterol biosynthesis in *Chlorella*, 244
Tropism, ethylene-induced, 80

U

Uredospores, germinating, cell walls, 519, 527

V

Valinomycin, circadian rhythm in *Gonyaulax polyedra*, 337
Vicia faba
chloroplast envelope lipids, 496
photosynthesis, 491
Victorin, oat growth and auxin response, 382

W

Warburg effect, glycolate synthesis in spinach chloroplasts, 790
Water content, relative, rapid estimates of, 258
Water loss, ripening in avocado fruit, 45
Water permeability, IAA, 229
Water potential, leaf, ABA, 125
Water status of kinetin-treated, salt-stressed plants, 241
Water transport across roots, inhibition by polyethylene glycol and phenylmercuric acetate, 663
Watermelon, seedling response to GA, 325
Wax, surface, response to photoperiod and dia!late, 269
Wheat
ATP during early germination, 779
DNA polymerase from embryos, 377
phenolic acids in coleoptile cell walls, 728
temperature adaptation in mitochondria, 426
winter, respiratory properties of mitochondria, 653
Wintering, amino acid metabolism in poplar, 319

X

Xanthium
gas exchange of prechilled leaves, 808
leaf movement rhythms, 176
Xanthoxin, ABA in spinach, 644

Z

Zinc acetate, improved nitrate reductase assay, 825

Volume Contents

Number 1. July

Effects of Ethylene and Gibberellic Acid on Cellular Growth and Development in Apical and Subapical Regions of Etiolated Pea Seedling. ROBERT N. STEWART, M. LIEBERMAN, AND A. T. KUNISHI 1

Metabolism of Tritiated Gibberellin A_9 by Shoots of Dark-grown Dwarf Pea, cv. Meteor. IAN D. RAILTON, RICHARD C. DURLEY, AND RICHARD P. PHARIS 4

Biosynthesis of Umbelliferose in *Aegopodium podagraria*. H. HOPF AND O. KANDLER 13

A Synergistic Stimulation of *Avena sativa* Coleoptile Elongation by Indoleacetic Acid and Carbon Dioxide. A. W. BOWN, I. J. DYMOCK, AND T. AUNG 15

The Influence of 0.03% Carbon Dioxide on Protein Metabolism of Etiolated *Avena sativa* Coleoptiles. A. W. BOWN AND T. AUNG 19

Lipase Activities in Castor Bean Endosperm during Germination. SHOSHI MUTO AND HARRY BEEVERS 23

Supercooling in Overwintering Azalea Flower Buds. MILON F. GEORGE, MICHAEL J. BURKE, AND CONRAD J. WEISER 29

Nucleic Acid and Protein Metabolism of Senescing and Regenerating Soybean Cotyledons. WILLIAM R. KRUL 36

L-Phenylalanine Ammonia-lyase Activity in *Robinia pseudoacacia* Seedlings. I. Cyclic Phenomenon Activity during Continuous Light. ANDRZEJ J. PODSTOLSKI AND GREGORY N. BROWN 41

Assimilation, Distribution, and Root Exudation of ^{14}C by Ponderosa Pine Seedlings under Induced Water Stress. C. P. PATRICK REID 44

The Respiratory Chain of *Chlorella protothecoides*. I. Inhibitor Responses and Cytochrome Components of Whole Cells. NEIL G. GRANT AND MAX H. HOMMERSAND 50

The Respiratory Chain of *Chlorella protothecoides*. II. Isolation and Characterization of Mitochondria. NEIL G. GRANT AND MAX H. HOMMERSAND 57

Change in Invertase Activity of Sweet Potato in Response to Wounding and Purification and Properties of Its Invertases. KAZUNOBU MATSUSHITA AND IKUZO URITANI 60

Characterization of Cadmium Uptake by Plant Tissue. JAY M. CUTLER AND DONALD W. RAINS 67

Phytochrome-mediated Germination Responses in γ-Irradiated Lettuce Seeds. A. I. HSIAO AND WILLIAM VIDAVER 72

Seasonal Patterns of Acid Metabolism and Gas Exchange in *Opuntia basilaris*. STAN R. SZAREK AND IRWIN P. TING 76

The Influence of Nitrate and Chloride Uptake on Expressed Sap pH, Organic Acid Synthesis, and Potassium Accumulation in Higher Plants. DALE G. BLEVINS, ANDREW J. HIATT, AND RICHIE H. LOWE 82

Gibberellic Acid-induced Phase Change in *Hedera helix* as Studied by Deoxyribonucleic Acid-Ribonucleic Acid Hybridization. CHARLES E. ROGLER AND MICHAEL E. DAHMUS 88

Protein Kinase Activity Associated with Isolated Ribosomes from Peas and *Lemna*. ROBERT A. B. KEATES AND ANTHONY J. TREWAVAS 95

Glyceraldehyde 3-Phosphate Dehydrogenases and Glyoxylate Reductase. II. Far Red Light-dependent Development of Glyceraldehyde 3-Phosphate Dehydrogenase Isozyme Activities in *Sinapis alba* Cotyledons. R. CERFF AND P. H. QUAIL 100

The Structure of Plant Cell Walls. V. On the Binding of Xyloglucan to Cellulose Fibers. BARBARA S. VALENT AND PETER ALBERSHEIM 105

The Structure of Plant Cell Walls. VI. A Survey of the Walls of Suspension-cultured Monocots. DAVID BURKE, PETER KAUFMAN, MICHAEL MCNEIL, AND PETER ALBERSHEIM 109

Structure, Gas Chromatographic Measurement, and Function of Suberin Synthesized by Potato Tuber Tissue Slices. P. E. KOLATTUKUDY AND B. B. DEAN 116

The Inhibition of Soybean Metabolism by Cadmium and Lead. CHI-YING HUANG, FAKHRI A. BAZZAZ, AND LARRY N. VANDERHOEF 122

Reduction in Extractable Deoxyribonucleic Acid Polymerase Activity in *Pisum sativum* Seedlings by Ethylene. A. APELBAUM, E. SFAKIOTAKIS, AND D. R. DILLEY 125

Instructions for Contributors i

Number 2. August

Effects of Cation Levels of the Nutrient Medium on the Biochemistry of *Chlorella*. I. Concentration Series. JEAN J. MACCARTHY AND GLENN W. PATTERSON 129

Effects of Cation Levels of the Nutrient Medium on the Biochemistry of *Chlorella*. II. Factorial Experiment. JEAN J. MACCARTHY AND GLENN W. PATTERSON 133

Specificity for Nicotinamide Adenine Dinucleotide by Nitrate Reductase from Leaves. GARY N. WELLS AND RICHARD H. HAGEMAN 136

The Effect of Temperature on Photoinduced Carotenoid Biosynthesis in *Neurospora crassa*. ROY W. HARDING 142

Structure and Function of Developing Barley Plastids. DIANE ROBERTSON AND WATSON MCMILLAN LAETSCH 148

Rapid Inhibition of Auxin-induced Elongation of *Avena* Coleoptile Segments by Cordycepin. MORRIS G. CLINE, MARILYN M. REHM, AND RICHARD H. WILSON 160
Phosphatidylglycerol Synthesis in Castor Bean Endosperm. Kinetics, Requirements, and Intracellular Localization. THOMAS S. MOORE, JR. 164
Efficiency and Regulation of Water Transport in Some Woody and Herbaceous Species. SAUL E. CAMACHO-B, ANTHONY E. HALL, AND MERRILL R. KAUFMANN 169
Water Permeability and Cold Hardiness of Cortex Cells in *Cornus stolonifera* Michx.—A Preliminary Report. J. S. MCKENZIE, C. J. WEISER, E. J. STADELMANN, AND M. J. BURKE 173
Boundary Layers of Air Adjacent to Cylinders. Estimation of Effective Thickness and Measurements on Plant Material. PARK S. NOBEL 177
Effect of 2,4-Dinitrophenol on Auxin-induced Ethylene Production and Auxin Conjugation by Mung Bean Tissue. OI-LIM LAU, DENNIS P. MURR, AND SHANG FA YANG 182
Multiple Forms and Intracellular Localization of Uridine Diphosphate Glucose Pyrophosphorylase in *Avena sativa*. WILLIAM C. GORDON AND LAWRENCE ORDIN 186
Peroxidases in Tobacco Abscission Zone Tissue. II. Time Course Studies of Peroxidase Activity during Ethylene-induced Abscission. EGBERT W. HENRY, JACK G. VALDOVINOS, AND THOMAS E. JENSEN 192
The Development of Isocitric Lyase Activity in Germinating Cotton Seed. ROBERTA H. SMITH, A. MICHAEL SCHUBERT, AND C. ROY BENEDICT 197
Influence of Assimilate Demand on Photosynthesis, Diffusive Resistances, Translocation, and Carbohydrate Levels of Soybean Leaves. JOHN H. THORNE AND H. RONALD KOLLER 201
Cellular and Ultrastructural Changes in Mesophyll and Bundle Sheath Cells of Maize in Response to Water Stress. KENNETH L. GILES, MICHAEL F. BEARDSELL, AND DANIEL COHEN 208
Evidence Against the Involvement of Galactosidase or Glucosidase in Auxin- or Acid-stimulated Growth. MICHAEL L. EVANS 213
Corrections 216

Number 3. September

Effects of Indoleacetic Acid on Dictyosomes of Apical and Expanding Cells of Oat Coleoptiles. STANLEY R. GAWLIK AND J. SHEN-MILLER 217
Dose-Response Curves for Radish Seedling Phototropism. MARYLEE EVERETT 222
The Effect of Molecular Size, Concentration in Nutrient Solution, and Exposure Time on the Amount and Distribution of Polyethylene Glycol in Pepper Plants. BYRON E. JANES 226
Role of Mitochondria in the Origin of Chloroplast Starch Grains. Description of the Phenomenon. S. G. WILDMAN, CHARLENE JOPE, AND B. A. ATCHISON 231
Plant Growth Retardants as Inhibitors of Sterol Biosynthesis in Tobacco Seedlings. TREVOR J. DOUGLAS AND LESLIE G. PALEG 238
Effect of Host-Specific Toxins on Electropotentials of Plant Cells. JOHN M. GARDNER, ROBERT P. SCHEFFER, AND NOE HIGINBOTHAM 246
Phosphate Absorption Rates and Adenosine 5′-Triphosphate Concentrations in Corn Root Tissue. WILLY LIN AND J. B. HANSON 250
Concentrations of Indole-3-acetic Acid and Its Esters in *Avena* and *Zea*. ROBERT S. BANDURSKI AND AGA SCHULZE 257
The Isolation and Partial Characterization of a Membrane Fraction Containing Phytochrome. DIETER MARMÉ, JOHN M. MACKENZIE, JR., JEAN BOISARD, AND WINSLOW R. BRIGGS 263
In Vivo Properties of Membrane-bound Phytochrome. JEAN BOISARD, DIETER MARMÉ, AND WINSLOW R. BRIGGS 272
Developmental Changes in Endosperm of Germinating Castor Bean Independent of Embryonic Axis. ANTHONY H. C. HUANG AND HARRY BEEVERS 277
Rhythmic Potassium Flux in *Albizzia*. Effect of Aminophylline, Cations, and Inhibitors of Respiration and Protein Synthesis. RUTH L. SATTER, PHILIP B. APPLEWHITE, AND ARTHUR W. GALSTON 280

Immunological and Biochemical Studies on Isozymes of Malate Dehydrogenase and Citrate Synthetase in Castor Bean Glyoxysomes. ANTHONY H. C. HUANG, PHILIP D. BOWMAN, AND HARRY BEEVERS 364
myo-Inositol 1-Phosphate Synthase Inhibition and Control of Uridine Diphosphate-D-glucuronic Acid Biosynthesis in Plants. MARY W. LOEWUS AND FRANK LOEWUS 368
Failure to Detect Cyclic 3′,5′-Adenosine Monophosphate in Healthy and Crown Gall Tumorous Tissues of *Vicia faba*. RICHARD M. NILES AND MARK S. MOUNT 372
Kaempferol Inhibitions of Corn Mitochondrial Phosphorylation. DAVID E. KOEPPE AND RAYMOND J. MILLER 374
Effects of Magnesium Deficiency on the Photosynthesis and Respiration of Leaves of Sugar Beet. NORMAN TERRY AND ALBERT ULRICH 379
The Occurrence and Nature of Ornithine Carbamoyltransferase in Senescing Apple Leaf Tissue. PATRICIA W. SPENCER AND JOHN S. TITUS 382
Biosynthesis of Grana and Stroma Lamellae in Spinach. FERNANDO HENRIQUES AND RODERIC PARK 386
Nuclear Magnetic Resonance of Water in Cold Acclimating Red Osier Dogwood Stem. MICHAEL J. BURKE, ROBERT C. BRYANT, AND CONRAD J. WEISER 392
Energy Metabolism of *Rumex* Leaf Tissue in the Presence of Senescence-regulating Hormones and Sucrose. JONATHAN GOLDTHWAITE 399
Enhanced Inflorescence Development in *Bougainvillea* "San Diego Red" by Removal of Young Leaves and Cytokinin Treatments. ANTHONY T. Y. TSE, ANGELO RAMINA, WESLEY P. HACKETT, AND ROY M. SACHS 404
Ultrastructural Evidence for Calcium Phosphate Deposition by Isolated Corn Shoot Mitochondria. JOHN H. PEVERLY, RAYMOND J. MILLER, CARL MALONE, AND DAVID E. KOEPPE 408
The Suitability of a Quantitative Spectrophotometric Assay for Phenylalanine Ammonia-lyase Activity in Barley, Buckwheat, and Pea Seedlings. JAMES A. SAUNDERS AND JERRY W. MCCLURE 412
Starch in Fungi. III. Isolation and Properties of an Amylose-precipitating Factor from *Lentinellus ursinus* Fruit Bodies. DEREK A. MCCRACKEN 414
Growth Responses to Sodium by *Bryophyllum tubiflorum* under Conditions Inducing Crassulacean Acid Metabolism. PETER F. BROWNELL AND CHRISTOPHER J. CROSSLAND 416

Number 4. October

On the 50th Anniversary of Our Society. J. B. HANSON 419
Conceptual Developments in Photosynthesis, 1924–1974. JACK MYERS 420
Plant Photobiology in the Last Half-Century. ARTHUR W. GALSTON 427
Conceptual Developments in Metabolic Control, 1924–1974. HARRY BEEVERS 437
Biological Nitrogen Fixation, 1924–1974. ROBERT H. BURRIS 443
Fifty Years of Plant Hormone Research. KENNETH V. THIMANN 450
Conceptual Developments in Membrane Transport, 1924–1974. NOE HIGINBOTHAM 454
Fifty Years of Progress in Water Relations Research. PAUL J. KRAMER 463
Long Distance Transport. MARTIN H. ZIMMERMANN 472
Dependence of Nitrite Reduction on Electron Transport Chloroplasts. C. A. NEYRA AND R. H. HAGEMAN 480
Fat Metabolism in Higher Plants. LXII. Stearl-acyl Carrier Protein Desaturase from Spinach Chloroplasts. BRUCE S. JACOBSON, J. G. JAWORSKI, AND P. K. STUMPF 484
Extraction and Partial Characterization of Cellulases from Expanding Pea Epicotyls. THOMAS E. FERRARI AND PAUL G. ARNISON 487
Cherry Fruit Abscission. Evidence for Time of Initiation and the Involvement of Ethylene. V. A. WITTENBACH AND M. J. BUKOVAC 494
Relationship between Promotion of Xyloglucan Metabolism and Induction of Elongation by Indoleacetic Acid. JOHN M. LABAVITCH AND PETER S. RAY 499
Metabolism of Glutamate in Suspension Cultures of Paul's Scarlet Rose Cells. JOHN S. FLETCHER 503
Similarities between the Actions of Ethylene and Cyanide in Initiating the Climacteric and Ripening of Avocados. THEOPHANES SOLOMOS AND GEORGE G. LATIES 506
Apical Correlative Effects in Leaf Epinasty of Tomato. SAIDOLLAH KAZEMI AND N. P. KEFFORD 512
Uptake of Bicarbonate Ion in Darkness by Isolated Chloroplast Envelope Membranes and Intact Chloroplasts of Spinach. RAYMOND P. POINCELOT 520
Membrane-surfactant Interactions in Lipid Micelles Labeled with 1-Anilino-8-naphthalenesulfonate. GARY M. MILLER AND JUDITH B. ST. JOHN 527
Photosynthetic Activity of Spinach Chloroplasts after Isopycnic Centrifugation in Gradients of Silica. J.-J. MORGENTHALER, C. A. PRICE, J. MICHAEL ROBINSON, AND MARTIN GIBBS 532

The Effect of Potassium on the Fixation of Molecular Nitrogen by Root Nodules of *Vicia faba*. KONRAD MENGEL, MOHAMMAD-REZA HAGHPARAST, AND KLAUS KOCH 535
The Manganese Toxicity of Cotton. SHEELA SIRKAR AND J. V. AMIN 539
Transition of Metabolism in Living Popular Bark from Growing to Wintering Stages and Vice Versa. Changes in Glucose 6-Phosphate and 6-Phosphogluconate Dehydrogenase Activities and in the Levels of Sugar Phosphates. SHONOSUKI SAGISAKA 544
The Location of Nitrite Reductase and Other Enzymes Related to Amino Acid Biosynthesis in the Plastids of Root and Leaves. BENJAMIN J. MIFLIN 550
Activation of Ribulose 1,5-Diphosphate Carboxylase by Nicotinamide Adenine Dinucleotide Phosphate and Other Chloroplast Metabolites. DOUGLAS K. CHU AND JAMES A. BASSHAM 556
Adenosine Phosphates in Germinating Radish (*Raphanus sativis* L.) Seeds. DONALD E. MORELAND, GRISCELDA G. HUSSEY, CAROLE R. SHRINER, AND FRED S. FARMER 560
A Method for Characterizing the Relation between Nutrient Concentration and Flux into Roots of Intact Plants. NORBERT CLAASSEN AND STANLEY A. BARBER 564
Physiological Studies with Isolated Leaf Cells. Early Products of Photosynthesis and Their Metabolic Interconversions. G. KULANDAIVELU AND A. GNANAM 569
Effects of Light Intensity and Oxygen on Photosynthesis and Translocation in Sugar Beet. JEROME C. SERVAITES AND DONALD R. GEIGER 575
A Method to Compare the Effect of Ionic Iron and Iron Chelates in Nutrient Solution Cultures. RUDOLF A. CHRIST 579
Iron Requirement and Iron Uptake from Various Iron Compounds by Different Plant Species. RUDOLF A. CHRIST 582
Detection and Identification of Cytokinins Produced by Mycorrhizal Fungi. CAROL B. CRAFTS AND CARLOS O. MILLER 586
A Simpler Iterative Steady State Solution of Münch Pressure-Flow Systems Applied to Long and Short Translocation Paths. MELVIN T. TYREE, A. LAWRENCE CHRISTY, AND JACK M. FERRIER 589
Multiple Amine Oxidases in Cucumber Seedlings. FRANK W. PERCIVAL AND WILLIAM K. PURVES 601
Formation of ^{14}C-Labeled Alanine from Pyruvate during Short Term Photosynthesis in a C_4 Plant. R. A. KENNEDY AND WATSON MCMILLAN LAETSCH 608
Studies on Soybean Nodule Senescence. ROBERT V. KLUCAS 612
Some Properties of Partially Purified Pyruvate Kinase from *Euglena gracilis* Klebs var. *bacillaris*. DENNIS VACCARO AND MICHAEL H. ZELDIN 617
Sterol Molecular Modifications Influencing Membrane Permeability. CLAUS GRUNWALD 624
Purification and Characterization of the Nitrate Reductase from the Diatom *Thalassiosira pseudonana*. NANCY K. AMY AND REGINALD H. GARRETT 629
Lysine Biosynthesis in Barley (*Hordeum vulgare* L.). BIRGER LINDBERG MØLLER 638
Kinetin-induced Changes in δ-Aminolevulinic Acid Dehydratase of Tobacco Callus. KAREN KAUL AND PRITAM S. SABHARWAL 644
A Simple Carbon Dioxide Injection System for Photosynthetic Studies. DAVID J. OLIVER, STEWART I. CAMERON, AND MICHAIL SCHAEDLE 649
Location of the Low Temperature Water Flow Barrier in Stems. FRED J. MOLZ AND CURT M. PETERSON 652
Promotion of Acetylene Reduction by *Rhizobium*—Soybean Cell Associations *in Vitro*. DONALD A. PHILLIPS 654
Structure of Some Cyclohexyl Compounds as Related to Their Ability to Stimulate Plant Growth. D. JAMES WORT AND KANTI M. PATEL 656

Number 5. November

Induction of Phenylalanine Ammonia-lyase in Strawberry Leaf Disks. Action Spectra and Effects of Wounding, Sucrose, and Light. PETER P. WONG, MILTON ZUCKER, AND LEROY CREASY 659
Effect of Glucose and Adenosine Phosphates on Production of Extracellular Carbohydrases of *Alternaria solani*. DAVID C. SANDS AND RAYMOND J. LUKENS 666
Structure and Biosynthesis of Cuticular Lipids. Hydroxylation of Palmitic Acid and Decarboxylation of C_{28}, C_{30}, and C_{32} Acids in *Vicia faba* Flowers. P. E. KOLATTUKUDY, RODNEY CROTEAU, AND LINDA BROWN 670
Regulation of Soybean Net Photosynthetic CO_2 Fixation by the Interaction of CO_2, O_2, and Ribulose 1,5-Diphosphate Carboxylase. WILLIAM A. LAING, WILLIAM L. OGREN, AND RICHARD H. HAGEMAN 678
Activation of 4-Hydroxycinnamate Hydroxylase in Extracts from *Sorghum*. HELEN A. STAFFORD 686
Physiological and Cytological Similarities between Disease Resistance and Cellular Incompatibility Responses. JOHN TEASDALE, DONNA DANIELS, WILLIAM C. DAVIS, ROBERT EDDY, JR., AND LEE A. HADWIGER 690
Plants under Climatic Stress. VI. Chilling and Light Effects on Photosynthetic Enzymes of Sorghum and Maize. ANTHONY O. TAYLOR, C. ROGER SLACK, AND HUGH G. MCPHERSON 696
On the Mechanism of the Changes in Phenylalanine Ammonia-lyase Activity Induced by Ultraviolet and Blue Light in Gherkin Hypocotyls. GERRIT ENGELSMA 702
Proteinase Inhibitor-inducing Factor in Plant Leaves. A Phylogenetic Survey. DOUGLAS MCFARLAND AND CLARENCE A. RYAN 706
Photosynthetic Adaptation to Temperature in C_3 and C_4 Grasses. A Possible Ecological Role in the Shortgrass Prairie. GEORGE J. WILLIAMS III 709
The Effect of Cyanide and Carbon Monoxide on the Electrical Potential and Resistance of Cell Membranes. W. PETER ANDERSON, DONALD L. HENDRIX, AND NOE HIGINBOTHAM 712

The Function of the Carbohydrate Units of Three Fungal Enzymes in Their Resistance to Dehydration. BEN DARBYSHIRE 717
Survival of Suspension-cultured Sycamore Cells Cooled to the Temperature of Liquid Nitrogen. Y. SUGAWARA AND A. SAKAI 722
Homoserine Esterfication in Green Plants. JOHN GIOVANELLI, S. HARVEY MUDD, AND ANNE H. DATKO 725
The Mode of Incorporation of 6-Benzylaminopurine into Tobacco Callus Transfer Ribonucleic Acid. A Double Labeling Determination. GRAHAM C. WALKER, NELSON J. LEONARD, DONALD J. ARMSTRONG, NORIMOTO MURAI, AND FOLKE SKOOG 737
Phospholipids in the Developing Soybean Seed. RICHARD F. WILSON AND ROBERT W. RINNE 744
Adenylate Energy Pool and Energy Charge in Maturing Rape Seeds. TE MAY CHING, JIM M. CRANE, AND DAVID L. STAMP 748
Properties of Glucosyltransferase and Glucan Transferase from Spinach. JAMES C. LINDEN, WIDMAR TANNER, AND OTTO KANDLER 752
Control of Diurnal Variations in Photosynthetic Products. I. Carbon Metabolism. BARRIE T. STEER 758
Control of Diurnal Variations in Photosynthetic Products. II. Nitrate Reductase Activity. BARRIE T. STEER 762
Autoradiographic Examination of Meristems of Intact Boron-deficient Squash Roots Treated with Tritiated Thymidine. MARTIN S. COHEN AND LUKE S. ALBERT 766
Oscillations in Stomatal Conductance. The Influence of Environmental Gain. GRAHAM D. FARQUHAR AND IAN R. COWAN 769
Glutamine Synthetase of Pea Leaves. Divalent Cation Effects, Substrate Specificity, and Other Properties. D. O'NEAL AND K. W. JOY 773
An Improved Method for the Isolation of Spinach Chloroplast Envelope Membranes. RAYMOND P. POINCELOT AND PETER R. DAY 780
L-Ascorbic Acid Metabolism in Vitaceae. Conversion to (+)-Tartaric Acid and Hexoses. GEORGE WAGNER AND FRANK A. LOEWUS 784
The Effect of Calcium Nutrition of Ethylene-induced Abscission. ELMO M. BEYER, JR. AND BRUNO QUEBEDEAUX, JR. 788
Microenvironmental Manipulation of the Observed Michaelis Constant of Ribulose Diphosphate Carboxylase. LOUISE E. ANDERSON 791
Sterol Accumulation and Composition in Developing *Zea mays* L. Kernels. D. LAYTON DAVIS AND CHARLES G. PONELEIT 794
Cholinesterases from Plant Tissue. V. Cholinesterase Is Not Pectin Esterase. RICHARD A. FLUCK AND MARK J. JAFFE 797
Increase in Electrogenic Membrane Potential with Washing of Corn Root Tissue. WILLY LIN AND J. B. HANSON 799
Announcement 802

Number 6. December

The Metabolism of Hormones during Seed Germination and Dormancy. IV. The Metabolism of (S)-2-^{14}C-Abscisic Acid in Ash Seed. ERNEST SONDHEIMER, EVA C. GALSON, EUGENE TINELLI, AND DANIEL C. WALTON 803
An Amphoteric Conjugate of [^{3}H]Gibberellin A_1 from Barley Aleurone Layers. RONN NADEAU AND LAWRENCE RAPPAPORT 809
An Early Response to Gibberellic Acid Not Requiring Protein Synthesis. YOSEF BEN-TAL AND J. E. VARNER 813
Permeability of Seed Coats to Water as Related to Drying Conditions and Metabolism of Phenolics. IRITH MARBACH AND ALFRED M. MAYER 817
Comparative Studies on Nitrate Reductase in *Agrostemma githago* Induced by Nitrate and Benzyladenine. MACHI FUKUYAMA DILWORTH AND HANS KENDE 821
Control of Nitrite Reductase Activity in Excised Embryos of *Agrostemma githago*. MACHI FUKUYAMA DILWORTH AND HANS KENDE 826
Respiration and Gas Exchange in Stem Tissue of *Opuntia basilaris*. STAN R. SZAREK AND IRWIN P. TING 829
Effect of pH and Auxin on Chloride Uptake into *Avena* Coleoptile Cells. BERNARD RUBENSTEIN 835
Partial Purification and Properties of a β-D-Glucosyltransferase Occurring in Germinating *Phaseolus aureus* Seeds. DAVID L. STORM AND W. Z. HASSID 840
Enzymatic Esterification of Indole-3-acetic Acid to *myo*-Inositol and Glucose. JAN KOPCEWICZ, AXEL EHMANN, AND ROBERT S. BANDURSKI 846
Effects of Germination-promoting Substances Given in Conjunction with Red Light on the Phytochrome-mediated Germination of Dormant Lettuce Seeds (*Lactuca sativa* L.). HENRY L. SPEER, ANDREW I. HSIAO, AND WILLIAM VIDAVER 852
Influence of Phenolic Acids on Ion Uptake. IV. Depolarization of Membrane Potentials. ANTHONY D. M. GLASS AND JAMES DUNLOP 855
The Metabolism of Oat Leaves during Senescence. II. Senescence in Leaves Attached to the Plant. KENNETH V. THIMANN, RICHARD R. TETLEY, AND TRAN VAN THANH 859
Growth Rate and Turgor Pressure. Auxin Effect Studies with an Automated Apparatus for Single Coleoptiles. PAUL B. GREEN AND W. RAYMOND CUMMINS 863
An Accounting of Horseradish Peroxidase Isozymes Associated with the Cell Wall and Evidence that Peroxidase Does Not Contain Hydroxyproline. EDWIN H. LIU AND DEREK T. A. LAMPORT 870
Structural and Physiological Changes in Sugar Beet Leaves during Sink to Source Conversion. ROBERT J. FELLOWS AND DONALD R. GEIGER 877

Evidence for Active Phloem Loading in the Minor Veins of Sugar Beet. SUSAN A. SOVONICK, DONALD R. GEIGER, AND ROBERT J. FELLOWS 886
Role of Free Space in Translocation in Sugar Beet. DONALD R. GEIGER, SUSAN A. SOVONICK, TERRI L. SHOCK, AND ROBERT J. FELLOWS 892
Isolation of Flower-inducing and Flower-inhibitory Factors from Aphid Honeydew. CHARLES F. CLELAND 899
Identification of the Flower-inducing Factor Isolated from Aphid Honeydew as being Salicylic Acid. CHARLES F. CLELAND AND ALFRED AJAMI 904
The Effect of Tonicity and Metabolic Inhibitors on Respiration and Ripening of Avocado Fruit Slices. PETER O. TINGWA AND ROY E. YOUNG 907
Some Effects of Applied Gibberellic Acid on the Synthesis and Degradation of Lipids in Isolated Barley Aleurone Layers. RICHARD D. FIRN AND HANS KENDE 911
Interference in Carotenogenesis as a Mechanism of Action of the Pyridazinone Herbicide Sandoz 6706. Accumulation of C-40 Carotenoid Precursors Inhibition of β-Carotene Synthesis and Enhancement of Phytoene Epoxidation. ABRAHAM BEN-AZIZ AND EPHRAIM KOREN 916
Localization of Enzymes of Glycolate Metabolism in the Alga *Chlorogonium elongatum*. HELMUT STABENAU 921
Globulin-specific Proteolytic Activity in Germinating Pumpkin Seeds as Detected by a Fluorescence Assay Method. PATRICIA W. SPENCER AND RICHARD D. SPENCER 925
Boron Deficiency in Unfertilized Cotton (*Gossypium hirsutum*) Ovules Grown *in Vitro*. ELLIOTT H. BIRNBAUM, CHARLES A. BEASLEY, AND W. MACK DUGGER 931
Evaluation of Parameters in the Isolation of Viable Protoplasts from Cultured Tobacco Cells. HIROFUMI UCHIMIYA AND TOSHIO MURASHIGE 936
In Vivo Molybdate Inhibition of Sulfate Transfer to *Porphyridium* Capsular Polysaccharide. J. Ramus 945
Autocatalysis in a Reconstituted Chloroplast System. DAVID A. WALKER AND ROSS McC. LILLEY 950
Endogenous Levels of Auxin and Tumorigenesis in a *Nicotiana* Amphiploid. IRA H. AMES 953
Penetration of Dry Seeds with Chemicals Applied in Acetone. KAR-LING TAO AND ANWAR A. KHAN 956
Announcement 959

Subject Index

A

Abscisic acid metabolism in ash seed, 803
Abscission
  cherry fruit, ethylene, 494
  ethylene-induced, calcium, 788
  peroxidase activity in tobacco, 192
Acclimation, cold, NMR in stem water, 392
Acetone, chemical applications to seeds in, 956
Acetylene reduction by *Rhizobium*-soybean cell associations, 654
Adenosine monophosphate, cyclic, failure to detect in crown gall tissues, 372
Adenosine phosphates
  in germinating radish seeds, 560
  production of extracellular carbohydrases by *Alternaria solani*, 666
Adenosine triphosphate, phosphate absorption rates, 250
Adenylate, energy state in maturing rape seeds, 748
Aegopodium podagraria, umbelliferose biosynthesis, 13
Agrostemma githago, nitrate reductase, 821, 826
Air, boundary layers adjacent to cylinders, 177
Alanine, ^{14}C-labeled, formation from pyruvate in C_4 plant, 608
Albizzia, rhythmic K^+ flux, 280
Aleurone, barley
  amphoteric conjugate of GA_1, 809
  GA and lipids, 911
Alga
  enzymes of glycolate metabolism, 921
  molybdate inhibition of sulfate transfer, 945
Alternaria solani, extracellular carbohydrases, 666
Amine oxidase in cucumber seedlings, 601
Amino acid biosynthesis in plastids, 550
γ-Aminolevulinic acid dehydratase, kinetin-induced changes in, in tobacco callus, 644
Aminophylline, rhythmic K^+ flux, 280
Ammonium salts, promotion of seed germination, 304
Amylose, precipitating factor, 414
1-Anilino-8-naphthalenesulfonate, membrane-surfactant interactions in lipid micelles labeled with, 527
Apple leaf ornithine carbamoyltransferase, 382
Ascorbic acid, metabolism in Vitaceae, 784
Ash, ABA metabolism in seed, 803
Assimilate demand, soybean photosynthesis, 201
Autocatalysis in reconstituted chloroplast system, 950
Auxin. *See also* Indoleacetic acid
  chloride uptake into oat coleoptile, 835
  cordycepin inhibition of coleoptile elongation induced by, 160
  DNP effect on ethylene production and conjugation of by mung bean tissue, 182
  growth, 213
  tumorigenesis in *Nicotiana* amphiploid, 953
Avocado
  ethylene and cyanide, 506
  ripening, 907
Azalea, supercooling in flower buds, 29

B

Bark, poplar, temporal control of metabolism, 544
Barley
  amphoteric conjugate of GA_1, 809
  developing plastids, 148
  GA and lipids, 911
  lysine biosynthesis, 638
Bean
  castor
    changes in detached endosperm, 277
    isozymes in glyoxysomes, 364
    lipases, 23
    phase changes in membranes, 320
    phosphatidylglycerol synthesis in endosperm, 164
    temperature effects on enzymes, 324
  mung
    DNP effect on auxin-induced ethylene production, 182
    glucosyltransferase, 840
Beet, sugar
  active phloem loading, 886
  effects of light intensity and oxygen on photosynthesis and translocation, 575
  Mg deficiency, 379
  role of free space in translocation, 892
  sink to source conversion in leaves, 877
Benzyladenine, studies on nitrate reductase, 821
6-Benzylaminopurine incorporation into tRNA, 737
Bicarbonate ion uptake by spinach chloroplasts, 520
Boron deficiency
  autoradiography of squash roots, 766
  in unfertilized cotton ovules, 921
Bougainvillea, flowering, 404
Boundary layers of air adjacent to cylinders, 177
Bud, azalea, supercooling, 29

C

Cactus
  respiration in stem tissue, 829
  seasonal patterns of acid metabolism and gas exchange, 76
Cadmium
  inhibition of soybean metabolism, 122
  uptake by plant tissue, 67
Calcium, ethylene-induced abscission, 788
Calcium phosphate deposition by corn mitochondria, 408
Callus, tobacco
  incorporation of 6-benzylaminopurine into tRNA, 737
  kinetin-induced changes in γ-aminolevulinic acid dehydratase, 644
Carbohydrases, extracellular, effect of glucose and adenosine phosphates on production of, 666
Carbon dioxide
  injection system for photosynthetic studies, 649
  protein synthesis in oat coleoptiles, 19
  regulation of fixation, 678
  stimulation of oat coleoptile elongation, 15
Carbon metabolism, diurnal variations, 758
Carbon monoxide, membrane resistance, 712
Carotenogenesis, pyridazinone herbicide, 916
Carotenoid, photo-induced biosynthesis, 142
Cation nutrition of *Chlorella*, 129, 133
Cauliflower, NAD-linked substrate oxidation, 360
Cellulase, from expanding pea epicotyls, 487
Cellulose fibers, xyloglucan binding, 105
Cell wall structure
  suspension-cultured monocots, 109
  xyloglucan binding to cellulose fibers, 105
Centrifugation, isopycnic, in density gradients, chloroplast photosynthesis after, 532
Cherry fruit abscission, ethylene, 494
Chlorella
  cation nutrition, 129, 133
  mitochondria, 57
  respiration and cytochromes, 50
Chloride
  influence of uptake on sap pH, organic acid synthesis, and K accumulation, 82
  pH and auxin effects on uptake, 835
Chloroplasts
  dependence of nitrite reduction on electron transport in, 480
  reconstituted, autocatalysis in, 950
  role of mitochondria in origin of starch grains, 231
  spinach
    biosynthesis of lamellae, 386
    HCO_3^- uptake by envelope membrane, 520
    isolation of envelope membranes, 780
    photosynthesis after centrifugation, 532
    stearyl-acyl carrier protein desaturase from, 484
Cholinesterase, pectin esterase, 797
Climacteric, ethylene and cyanide in avocado, 506
Cold hardiness of dogwood cortex cells, 173
Coleoptile, oat
  chloride uptake, 835
  CO_2-stimulated protein synthesis, 19
  cordycepin inhibition of elongation, 160
  IAA- and CO_2-induced growth, 15
  IAA effects on dictyosomes, 217
  red light, 286
Cordycepin, inhibition of *Avena* coleoptile elongation, 160

Corn
ATP and phosphate absorption rates, 250
calcium phosphate deposition, 408
climatic stress, 696
electrogenic potentials of roots, 799
IAA, 257
kaempferol inhibition of mitochondrial phosphorylation, 374
sterols in developing kernels, 794
ultrastructure and water stress, 208
Cortex cells, dogwood, water permeability and cold hardiness, 173
Cotton
boron deficiency in unfertilized ovules, 931
isocitric lyase activity in germinating seed, 197
manganese toxicity, 539
stomatal conductance, 769
Cotyledon, soybean, senescence and regeneration, 36
Crassulacean acid metabolism, growth responses to sodium, 416
Crown gall tumor, failure to detect cAMP in, 372
Cucumber, amine oxidases in seedlings, 601
Cyanide
avocado climacteric and ripening, 506
membrane resistance, 712
Cyclohexyl compounds, plant growth, 656
Cytochromes, respiratory chain of *Chlorella*, 50
Cytokinins
oat leaf metabolism during senescence, 294
produced by mycorrhizal fungi, 586

D

Dehydration of fungal enzymes, 717
Deoxyribonucleic acid polymerase, reduction in activity by ethylene, 125
Dictyosomes, oat coleoptile IAA, 217
Dinitrophenol, auxin-induced ethylene production, 182
Disease resistance, cellular incompatibility responses, 690
Diurnal variations
carbon metabolism, 758
nitrate reductase activity, 762
Dogwood
NMR of stem water, 392
water permeability and cold hardiness, 173

E

Electron transport in chloroplasts, dependence of nitrite reduction on, 480
Electropotentials, effects of toxins, 246
Elongation, IAA-induced, xyloglucan, 499
Embryo, *Agrostemma githago*, control of nitrate reductase activity, 826
Endosperm, castor bean
changes in detached, 277
lipases, 23
phase changes in membranes, 320
phosphatidylglycerol synthesis in, 164
Epicotyl, pea, cellulases from, 487
Epinasty, tomato leaf, apical effects, 512
Esterification, homoserine, in green plants, 725
Ethylene
avocado climacteric and ripening, 506
calcium and abscission induced by, 788
cherry fruit abscission, 494
DNA polymerase activity, 125
effect of DNP on auxin-induced production of, 182
pea seedling cellular growth and development, 1
Euglena, pyruvate kinase from, 617

F

Fat metabolism in higher plants, 484
Flowering
enhancement of in *Bougainvillea*, 404
honey dew
factors affecting, 899
salicylic acid, 904
Fungi
dehydration and enzymes, 717
mycorrhizal, cytokinins produced by, 586
starch, 414

G

Galactosidase, growth, 213
Gas exchange
cactus stem, 829
seasonal patterns in cactus, 76
Germination
adenosine phosphates in radish seeds, 560
lipases in castor bean endosperm, 23
promotion of, 304
Gherkin, phenylalanine ammonia-lyase in hypocotyls, 702
Gibberellic acid
early response not requiring protein synthesis, 813
lipids in barley aleurone, 911
pea seedling cellular growth, and development, 1
phase change in *Hedera helix*, 88
Gibberellin A_1, amphoteric conjugate from barley aleurone, 809
Gibberellin A_9, tritiated, metabolism by pea shoots, 6
β-Glucan synthetase of onion plasma membrane, 333
Glucan transferase from spinach, 752
Glucose
esterification of IAA to, 846
production of extracellular carbohydrases by *Alternaria solani*, 666
Glucose 6-phosphate in growing and wintering poplar bark, 544
Glucosidase, growth, 213
Glucosyltransferase
from spinach, 752
in bean seeds, 840
Glutamate metabolism in rose cells, 503
Glutamine synthetase of pea leaves, 773
Glyceraldehyde 3-phosphate dehydrogenase
light regulation, 100
of pea, 312
Glycolate, enzymes of metabolism in alga, 921
Glyoxylate reductase, light regulation, 100
Glyoxysomes, castor bean, isozymes, 364
Golgi apparatus of onion stem, β-glucan synthetases of, 333
Grass, C_3 and C_4, photosynthetic adaptation to temperature, 709
Growth
auxin- or acid-stimulated, 213
cyclohexyl compounds, 656
Growth promoters, germination of dormant lettuce seeds, 852
Growth rate, turgor pressure, 863
Growth retardants, sterol biosynthesis in tobacco seedlings, 238

H

Hedera helix, GA_3-induced phase change, 88
Homoserine, esterification in green plants, 725
Honeydew
factors affecting flowering, 899
salicylic acid and flowering, 904
Hormones, plant, 50 years of research in, 450
Horseradish peroxidase isozymes, 870
4-Hydroxycinnamate hydroxylase activation in *Sorghum* extracts, 686
Hydroxylamine, promotion of seed germination, 304
Hypocotyl
gherkin, phenylalanine ammonia-lyase, 702
soybean, multiple RNA polymerases, 349
Hypocotyl hook, lettuce, hormone-solute interactions, 289

I

Indoleacetic acid. *See also* Auxin
dictyosomes of oat coleoptiles, 217
esterification to *myo*-inositol and glucose, 846
in corn and oat, 257
stimulation of oat coleoptile elongation 15
xyloglucan metabolism and induction of elongation by, 499
Inositol, esterification of IAA to, 846
myo-Inositol 1-phosphate synthase, inhibition, 368
Invertase in fresh and wounded sweet potato, 60
Iron
requirement and uptake by different plants, 582
uptake of ionic *versus* chelated, 579
Isocitric lyase activity in germinating cotton seed, 197
Isozymes of malate dehydrogenase and citrate synthetase in castor bean glyoxysomes, 364

K

Kaempferol, inhibition of corn mitochondrial phosphorylation, 374
Kernel, corn, sterols, 794
Kinetin, changes in γ-aminolevulinic acid dehydratase of tobacco callus, 644

L

Lamellae, spinach chloroplast, biosynthesis, 386
Lead, inhibition of soybean metabolism, 122
Leaf
amino acid biosynthesis, 550
apple, ornithine carbamoyltransferase, 382
NADH-specific nitrate reductase, 136
oat, metabolism during senescence, 294, 859
pea, glutamine synthetase, 773
physiological studies with isolated cells, 569

proteinase inhibitor-inducing factor, 706
Rumex, energy metabolism and senescence, 399
soybean, assimilate demand and photosynthesis, 201
strawberry, induction of phenylalanine ammonia-lyase, 659
sugar beet
Mg deficiency, 379
sink to source conversion, 877
tomato, apical effects in epinasty, 512
Lemma, ribosomal protein kinase, 95
Lettuce
hormone-solute interactions in hypocotyl hook, 289
light and growth promoters on dormant seeds, 852
γ-radiation and phytochrome responses, 72
Light, red, coleoptile growth, 286
Lipase activities in germinating castor bean endosperm, 23
Lipid micelles, membrane-surfactant interactions, 527
Lipids
cuticular, structure and biosynthesis of, 670
GA effects on in barley aleurone, 911
Locust, PAL activity in seedlings, 41
Lysine biosynthesis in barley, 638

M

Magnesium deficiency, photosynthesis and respiration of sugar beet leaves, 379
Maize. *See* Corn
Manganese toxicity for cotton, 539
Membrane potentials, phenolic acids, 855
Membrane resistance, cyanide and CO, 712
Membrane-surfactant interactions in lipid micelles, 527
Membrane transport, conceptual developments, 1924–1974, 454
Metabolic control, conceptual developments, 1924–1974, 437
Michaelis constant of ribulose-diP carboxylase, 791
Mitochondria
cauliflower, NAD-linked substrate oxidation, 360
Chlorella, 57
corn
calcium phosphate deposition, 408
kaempferol inhibition of phosphorylation, 374
origin of chloroplast starch grains, 231
Molybdate, inhibition of sulfate transfer, 945
Münch pressure-flow systems, 589

N

Neurospora crassa, photo-induced carotenoid biosynthesis, 142
Nicotinamide adenine dinucleotide
nitrate reductase specific for, 136
substrate oxidation, 360
Nicotinamide adenine dinucleotide phosphate, activation of ribulose 1,5-diphosphate carboxylase, 556
Nitrate
influence of uptake on sap pH, organic acid synthesis, and K accumulation, 82
promotion of seed germination, 304
Nitrate reductase
comparative studies, 821
control of activity in embryos, 826
diurnal variations, 762
from the diatom *Thalassiosira pseudonana*, 629
NADH-specific, 136
Nitrite, promotion of seed germination, 304
Nitrite reductase, amino acid biosynthesis in plastids, 550
Nitrite reduction, dependence on electron transport in chloroplasts, 480
Nitrogen
biological fixation, 443
fixation by *Vicia* root, effect of K, 535
liquid, survival of cells in, 722
Nuclear magnetic resonance of stem water, 392
Nucleic acid metabolism of senescing and regenerating soybean cotyledons, 36

O

Oat
chloride uptake, 835
CO_2-stimulated protein synthesis, 19
cordycepin inhibition of coleoptile elongation, 160
IAA, 257
IAA- and CO_2-induced growth, 15
IAA effects on coleoptile dictyosomes, 217
leaf metabolism during senescence, 294
localization of UDPG pyrophosphorylase, 186
red light and coleoptile growth, 286
senescence in leaves, 859
Onion, glucan synthetases of plasma membranes, 333
Organogenesis, inter-tissue correlations in organ fragments, 341
Ornithine carbamoyltransferase in senescing apple leaf, 382
Ovule, cotton, boron deficiency, 931
Oxygen, beet photosynthesis and translocation, 575

P

Palmitic acid, hydroxylation of in *Vicia faba* flowers, 670
Pea
cellulases from expanding epicotyls, 487
effects of ethylene and GA on cellular growth and development of seedling, 1
ethylene and DNA polymerase activity, 125
glutamine synthetase of leaves, 773
glyceraldehyde-3-P dehydrogenase, 312
metabolism of tritiated gibberellin A_9, 6
ribosomal protein kinase, 95
RNA polymerases from seedlings, 356
xyloglucan and induction of elongation, 499
Pepper, polyethylene glycol distribution, 226
Peroxidase in tobacco abscission zone, 192
Petiole, tomato, polarity of thiamine movement, 310
pH
chloride uptake into oat coleoptile, 835
sap, influence of nitrate and chloride uptake, 82
Phenolic acids, ion uptake, 855
Phenylalanine ammonia-lyase
activity in locust seedlings, 41
induction in strawberry leaf, 659
in gherkin hypocotyls, 702
spectrophotometric assay for, 412
Phloem, active loading in sugar beet, 886
Phosphate absorption rates and ATP in corn root, 250
Phosphatidylglycerol synthesis in castor bean endosperm, 164
6-Phosphogluconate dehydrogenase in growing and wintering poplar bark, 544
Phospholipids in developing soybean seed, 744
Photobiology in last half-century, 427
Photosynthesis
assimilate demand, 201
conceptual developments, 1924–1974, 420
effects of light intensity and oxygen on, in beet, 575
Phototropism, radish seedling, 222
Phytochrome
germination responses in γ-irradiated lettuce seeds, 72
membrane-bound, 272
membrane fraction containing, 263
Pine, water stress and root exudation, 44
Plastids
amino acid biosynthesis, 550
barley, developing, 148
Polyethylene glycol distribution in pepper plants, 226
Poplar, temporal control of metabolism, 544
Portulaca, alanine from pyruvate in, 608
Potassium
fixation of molecular nitrogen by *Vicia* root, 535
influence of nitrate and chloride uptake on accumulation of, 82
rhythmic flux in *Albizzia*, 280
Potato
sweet, invertase and wounding, 60
wound suberin, 116
Protein
CO_2-stimulated synthesis in oat coleoptiles, 19
metabolism in senescing and regenerating soybean cotyledons, 36
Proteinase inhibitor-inducing factor in leaves, 706
Protein kinase, ribosomal, 95
Protoplast, viable, from cultured tobacco cells, 936
Pumpkin, globulin-specific proteolytic activity, 925
Pyridazinone herbicide, carotenogenesis, 916
Pyruvate, formation of ^{14}C-alanine from in C_4 plant, 608
Pyruvate kinase from *Euglena*, 617

R

γ-Radiation, phytochrome responses, 72
Radish
adenosine phosphates in seeds, 560
seedling phototropism, 222
Rape, adenylate energy state in maturing seeds, 748
Ribonucleic acid polymerases
from pea seedlings, 356
multiple, from soybean hypocotyl, 349
Ribosomes, pea and *Lemma*, protein kinase, 95

Ribulose diphosphate carboxylase
activation by NADP, 556
Michaelis constant, 791
Ripening
avocado, 907
ethylene and cyanide in avocado, 506
Root
amino acid biosynthesis in plastids, 550
corn
ATP and phosphate absorption rates, 250
electrogenic potentials, 799
measurement of nutrient flux, 564
pine, water stress and exudation, 44
squash, autoradiography in boron deficiency, 766
Vicia, nitrogen fixation, 535
Rose, glutamate metabolism in cells, 503
Rumex, energy metabolism and leaf senescence, 399

S

Salicylic acid, flowering in honeydew, 904
Sap, influence of nitrate and chloride uptake on pH, 82
Seed
ash, ABA metabolism, 803
cotton, isocitric lyase activity during germination, 197
dry, penetration with chemicals applied in acetone, 956
lettuce
light and growth promoters, 852
γ-radiation and phytochrome responses, 72
mung bean, glucosyltransferase, 840
promotion of germination, 304
pumpkin, globulin-specific proteolytic activity, 925
radish, adenosine phosphates in, 560
rape, adenylate energy pool, 748
soybean, phospholipids, 744
water permeability of coats, 817
Seedling
castor bean, temperature effects on enzymes, 324
cucumber, amine oxidases, 601
locust, PAL activity, 41
pea
effects of ethylene and GA on cellular growth and development, 1
ethylene and DNA polymerase activity, 125
RNA polymerases, 356
radish, phototropism, 222
tobacco, growth retardants and sterol biosynthesis, 238
Senescence
apple leaf ornithine carbamoyltransferase, 382
energy metabolism, 399
metabolism of oat leaves, 294, 859
nucleic acid and protein metabolism of soybean cotyledons, 36
soybean nodule, 612
Shoot
corn, calcium phosphate deposition, 408
pea, metabolism of tritiated gibberellin A_9, 6
Sodium, growth responses to, by a CAM species, 416
Sorghum
activation of 4-hydroxycinnamate hydroxylase, 686
climatic stress, 696
Soybean
acetylene reduction, 654
assimilate demand and photosynthesis, 201
inhibition of metabolism by cadmium and lead, 122
multiple RNA polymerases from hypocotyl, 349
nodule senescence, 612
phospholipids in developing seed, 744
regulation of CO_2 fixation, 678
senescence and regeneration of cotyledons, 36
Spinach
biosynthesis of chloroplast lamellae, 386
glucosyltransferase and glucan transferase, 752
HCO_3^- uptake by chloroplast envelope membrane, 520
isolation of chloroplast envelope membranes, 780
photosynthesis of chloroplasts after centrifugation, 532
stearyl-acyl carrier protein desaturase from chloroplasts, 484
Squash, autoradiography of boron-deficient roots, 766
Starch
in fungi, 414
mitochondria and origin of, in chloroplasts, 231
Stearyl-acyl carrier protein desaturase from spinach chloroplasts, 484
Stem
cactus, respiration, 829
dogwood, NMR of water, 392
low temperature water flow barrier, 652
onion, glucan synthetases of plasma membranes, 333
Sterols
growth retardants and biosynthesis of, 238
in developing corn kernels, 794
molecular modifications influencing membrane permeability, 624
Stomata, conductance oscillations, 769
Stress, climatic, photosynthetic enzymes, 696
Suberin, wounded potato, 116
Sucrose, induction of phenylalanine ammonia-lyase, 659
Sulfate, molybdate inhibition of transfer, 945
Supercooling in flower buds, 29
Sweet potato. *See* Potato, sweet
Sycamore cell survival in liquid nitrogen, 722

T

Temperature
castor bean enzymes, 324
phase changes in castor bean membranes, 320
photo-induced carotenoid biosynthesis in *Neurospora crassa*, 142
photosynthetic adaptation of C_3 and C_4 grasses to, 709
Thalassiosira pseudonana, nitrate reductase from, 629
Thiamine, polarity of movement, 310
Thymidine, tritiated, boron-deficient squash roots treated with, 766
Tobacco
growth retardants and sterol biosynthesis in seedlings, 238
incorporation of 6-benzylaminopurine into tRNA, 737
kinetin-induced changes in γ-aminolevulinic acid dehydratase, 644
peroxidases in abscission zone, 192
protoplasts from cultured cells, 936
Tomato
apical effects in leaf epinasty, 512
polarity of thiamine movement, 310
wound hormone, 328
Torenia fournieri, inter-tissue correlations in organ fragments, 341
Toxins, effects on electropotentials, 246
Transfer ribonucleic acid, incorporation of 6-benzylaminopurine into, 737
Translocation
effects of light intensity and oxygen on, in beet, 575
long distance, 472
Münch pressure-flow systems, 589
role of free space, 892
Tumorigenesis, auxin levels in *Nicotiana* amphiploid, 953
Turgor pressure, growth rate, 863

U

Umbelliferose biosynthesis in *Aegopodium podagraria*, 13
Urease, ribulose-diP carboxylase, 791
Uridine diphosphate glucose pyrophosphorylase localization in oat, 186
Uridine diphosphate-D-glucuronic acid biosynthesis, 368

V

Vicia faba
cuticular lipids, 670
failure to detect cAMP in crown gall tissues, 372
nitrogen fixation by root, 535
Vitaceae, ascorbic acid metabolism, 784

W

Water, transport in woody and herbaceous species, 169
Water permeability
of dogwood cortex cells, 173
of seed coats, 817
Water relations, 50 years of research in, 463
Water stress
corn ultrastructure, 208
root exudation, 44
Wounding
induction of phenylalanine ammonia-lyase, 659
proteinase inhibitor-inducing factor, 328
suberin in potato, 116
sweet potato invertases, 60

X

Xyloglucan
binding to cellulose fibers, 105
metabolism of and IAA induction of elongation, 499
